

# FonkenWoofTL ov8

© 2008 planet\_10 enterprises limited  
 12 - may -2008  
 designed & drawn by dld  
 free for non-commercial use only

Notes:

- 0/ uses 15 & 18 mm baltic birch plywood
- 1/ some internal panels are holey to increase useable volume.
- 2/ feel free to increase width if need to match specific Fonken build
- 3/ a block should be placed between the backs of the magnets to couple the drivers
- 4/ stuffing we used is fairly complex. At a minimum 0.35 lbs/ft<sup>3</sup> of polyfluff. We used a varying density fill scheme (wool felt, higher density away from the terminus, walls lined around driver)

- 15mm baffle
  - 18mm inner holey
  - 15mm TL partition
  - 18mm outer solid
- not shown, 15mm front-to-back holey brace
