

Second stab ©: diyaudio_freddi
 42" high Karlson
 slot w/ 18"
 Eminence (Sigma?)

Plan!-D-20(hz)Macro Sub..tapped horn by moi.
 from speakerplans.com, 27 March 2009 by freddi:
 ...this one for 18" was 42"H x 22.5W x 16D...
 ...there's about 30sq.in of port - it need to be
 deeper than the 0.7" material thickness...
 ...the board above the 23 degree woofer panel
 tilt's forwards by ~6 degrees...theres a curved
 reflector above that panel...
 ...an experiment...going a bit taller aspect-wise
 than K15 and Fig6 of patent 3540544...
