

# Inverting CMOY Headphone Amplifier with DC servo - V1.0

## For 5V USB power supplies ONLY with AD8656 or OPA2835

agdr 2014

IC decoupling caps

Power "on" LED

USB inrush current limiter

USB noise filter

Helpful input from 00940 and sgrossklass on diyaudio.com -> headphone forum

Use dedicated 5V op-amps:  
AD8656 -or- OPA2835

Servo = OP777 (single ended, DC precision)

For use with aHammond 1455C801 case
