

as originally designed in Hornresp

as drawn

Note:  
Front and back panel are removable  
—and the same size—for driver and  
stuffing access.  
Round port (terminus) preferred.

Derived from T-TQWT by bjorno for permco:  
here: Single driver TB W8Q-1071D

Duct height @:  
S1=5.221"  
S2=3.629  
S3=2.797  
S4=2.696  
L12=55.610  
L23=74.410  
L34=7

Stuffing:  
Fiberfill @ .5lbs/ft<sup>2</sup>  
Lining in the top 180°  
turn, and around the  
back of the woofer.  
Fill volume ~ 1.34ft<sup>3</sup>  
Fiberfill weight ~ .7lbs.  
Density should be highest  
around S1, and taper off  
towards the driver (S2)  
area.

The little block below the  
port must be moved down  
for a round port.
