

Notes:

Update on xrk971's PPSL_SY (pushpullslotloaded_slotvented) for the MCM 55-2421 with updated driver drawings.

The maximum displacement as per the drawing is: 21.6mm.

The internal width is: 10" [25.4cm].

Materials as drawn: MDF - 3/4" for external boards, and 1/2" for all internal boards.

Duct length is 23" [58.42cm]. Duct height is 3/4" for the individual section, and 1-1/2" for the combined center section.

Building suggestion:
 Draw board outlines on a 23-1/2" x 16-3/4" board. Get the additional needed dimensions from that drawing. All angles are 15°/75°. Round all corners at the duct inlets and corners.
