Notes:

- 1 Depending on the pulley/spindle you use, 0.1 RPM=0.18Hz, 0.13333 Hz , 0.15Hz or 0.11111Hz
- 2 RoadRunner tach synchronizes turntable speed to ±0.005 RPM regardless of belt tension, slippage etc.
- 3 Front Panel Selectable
- 4 User must compute frequency output for different pulleys/spindles
