QUOTATION

Price and delivery as requested: -

All prices quoted are in pounds (GBP).

1. Transformer

Voltage output 24-21-18-0-18-21-24 (so I can fine tune the output of the amplifier based on voltages)

I would like some form of static screen used between the windings, not sure if you can add copper foil as well. A varnish protection.

Basically I want to minimize interference.

I would like a 12volt output doesn't have to be huge amps, current rating can be 1amp at a guess. Just needs to power some speaker protection boards which require a 12v input.

Style Open Frame

Rating Continuous (800VA Frame)

Connection flying leads

Size 167W x 140H x 141D

Weight 11kg

This is with a copper shield around the coil / core as requested

Price based on an order quantity of 1 unit @ £284.90 each nett ex works.

Delivery: 2 – 3 weeks from receipt of order.

Carriage charged at cost.

Terms payment with order total amount including p&p & VAT is £361.08

This quotation is valid for thirty days from date of issue, unless otherwise specified.
