

2N3053/40053 5 watts @25°C TO-5 Package

2N3054 25 watts @25°C "Small TO-3" Package

2N3055 115 watts @25°C TO-3 Package

# *Great new RCA Transistors offer Silicon Performance at new low prices*

## AVAILABLE FOR IMMEDIATE DELIVERY

The 2N3053 is a triple diffused planar type, and can be used in small signal, medium power applications up to 20 megacycles.

The 2N3054 and 2N3055 are diffused junction types and are particularly useful in power switching circuits, series-regulator and shunt-regulator driver and output stages.

- Power Supplies
- Converters
- Auto-Ignition Systems
- Voltage Regulators
- Inverters
- Speed Control
