Dual 15-20V power input

TPA6120 has 0.00014% ultra-low distortion, and has plenty of 6000Ω drive capability! Supply voltage ± 5-15V, 1300V / us EHV swing

Ultra-low noise floor indicators have inaudible SNR ultrahigh monitor level sound performance, to restore the original sound details
Exposed cooling method more reliable HDVD800 on the use of this chip
