

610 disc stage. Components shown are right channel only.
For the left channel components have 100 added to the
reference numbers.

610 Line Stage issue 2 of
 diagram as in production in
 Jan. '98. Unchecked
 B. Powell 11-04-98.
 Updated 24/03/01

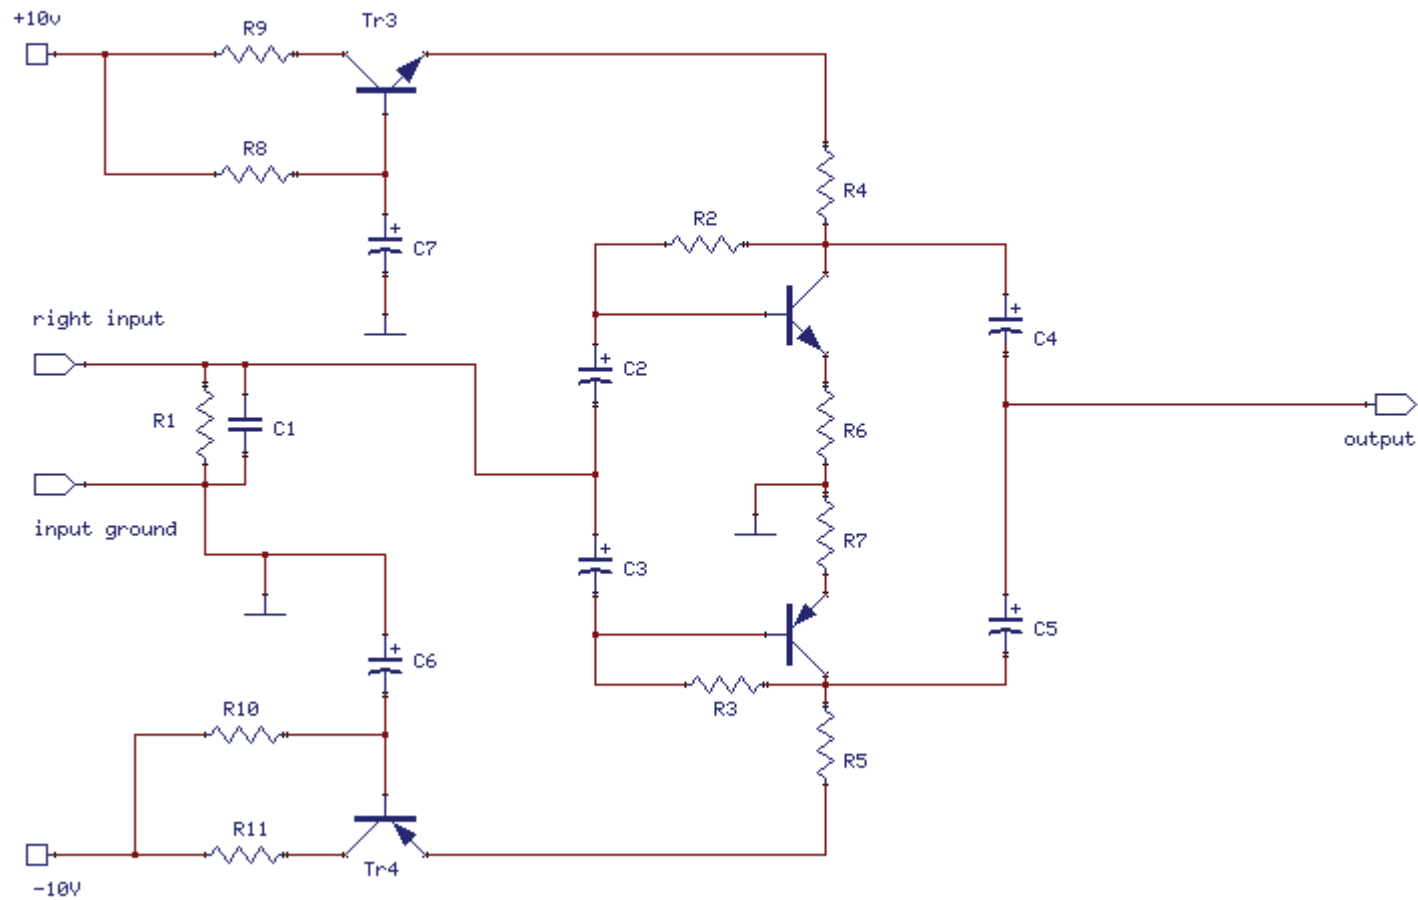

Brackets show right channel , left channel connection numbers respectively

An external rectifier and series resistors feed currents of approximately 32mA to the PCB. There is about 20mA through each shunt regulator chip.

Decoupling capacitors for the PCB are shown on the line stage circuit diagram.

MC3 schematic.
Bypass switching not shown.
Drawn 9-08-09 from 11-04-98 issue.

Right channel components shown
Power supply components Tr3,4 etc are common to both channels
i.e. not repeated
