**TUBE TYPE
7645**

The 7645 is a miniature twin tetrode designed for use in communication equipment as a frequency multiplier and for special amplifier service. The 7645 is identical in characteristics to the 6939 except that the bulb is reduced in height and the internal neutralization is removed. As a tripler it can deliver an actual plate power output of 1.5 watts CCS and 1.75 watts ICAS. Maximum ratings apply to 500 Mc.

The 7645 features a frame grid construction which results in improved performance and reliability.
