

The most satisfying volume on anybody's bookshelf . . . The new LEAK MINI-SANDWICH

The world's second very low distortion, piston-action loudspeaker is here! It's the Leak Mini-Sandwich, bookshelf version of the first: the Leak Sandwich Loudspeaker that is used in broadcasting studios throughout the world for checking the quality of transmissions.

At the heart of both—the new "Mini-Sandwich" and the "Sandwich"—are the revolutionary SANDWICH* cones of the speaker motors. Fantastically rigid, yet no heavier than conventional paper cones, these unique diaphragms are made of thick polystyrene foam, sandwiched in skin-thin aluminium. They respond with piston-like precision to the wave form of the voice coil signals. The rigidity of the Sandwich Cone eliminates "cone break-up", the erratic flexing which causes distortion in other speakers.

Result: a remarkably smooth frequency response, free from violent peaks or troughs over a very broad frequency band. Transient response is excellent.

If space permits there is only one choice: the Leak "Sandwich". But if space is a problem you will find the "Mini-Sandwich" is a superlative small loudspeaker, designed and made exactly as the standard "Sandwich" and the performance is indistinguishable from the larger model except for the lowest octave.
