

Image® • the sound couple •

The Image® is the first true, full range ribbon speaker.

Extensive research and listening tests have confirmed the superiority of planar type speakers, which have the ability to produce brilliant transient detail and image depth. However, all previous designs have compromised the inherent advantages with crossover networks and signal distorting components. The IMAGE speaker eliminates all crossover networks (transformers, inductors, capacitors and resistors) from the signal path, preventing coloration and phase shift caused by these devices. The IMAGE speaker is the first true, full-range speaker which couples, over the entire audio spectrum, the original music signal to the air.

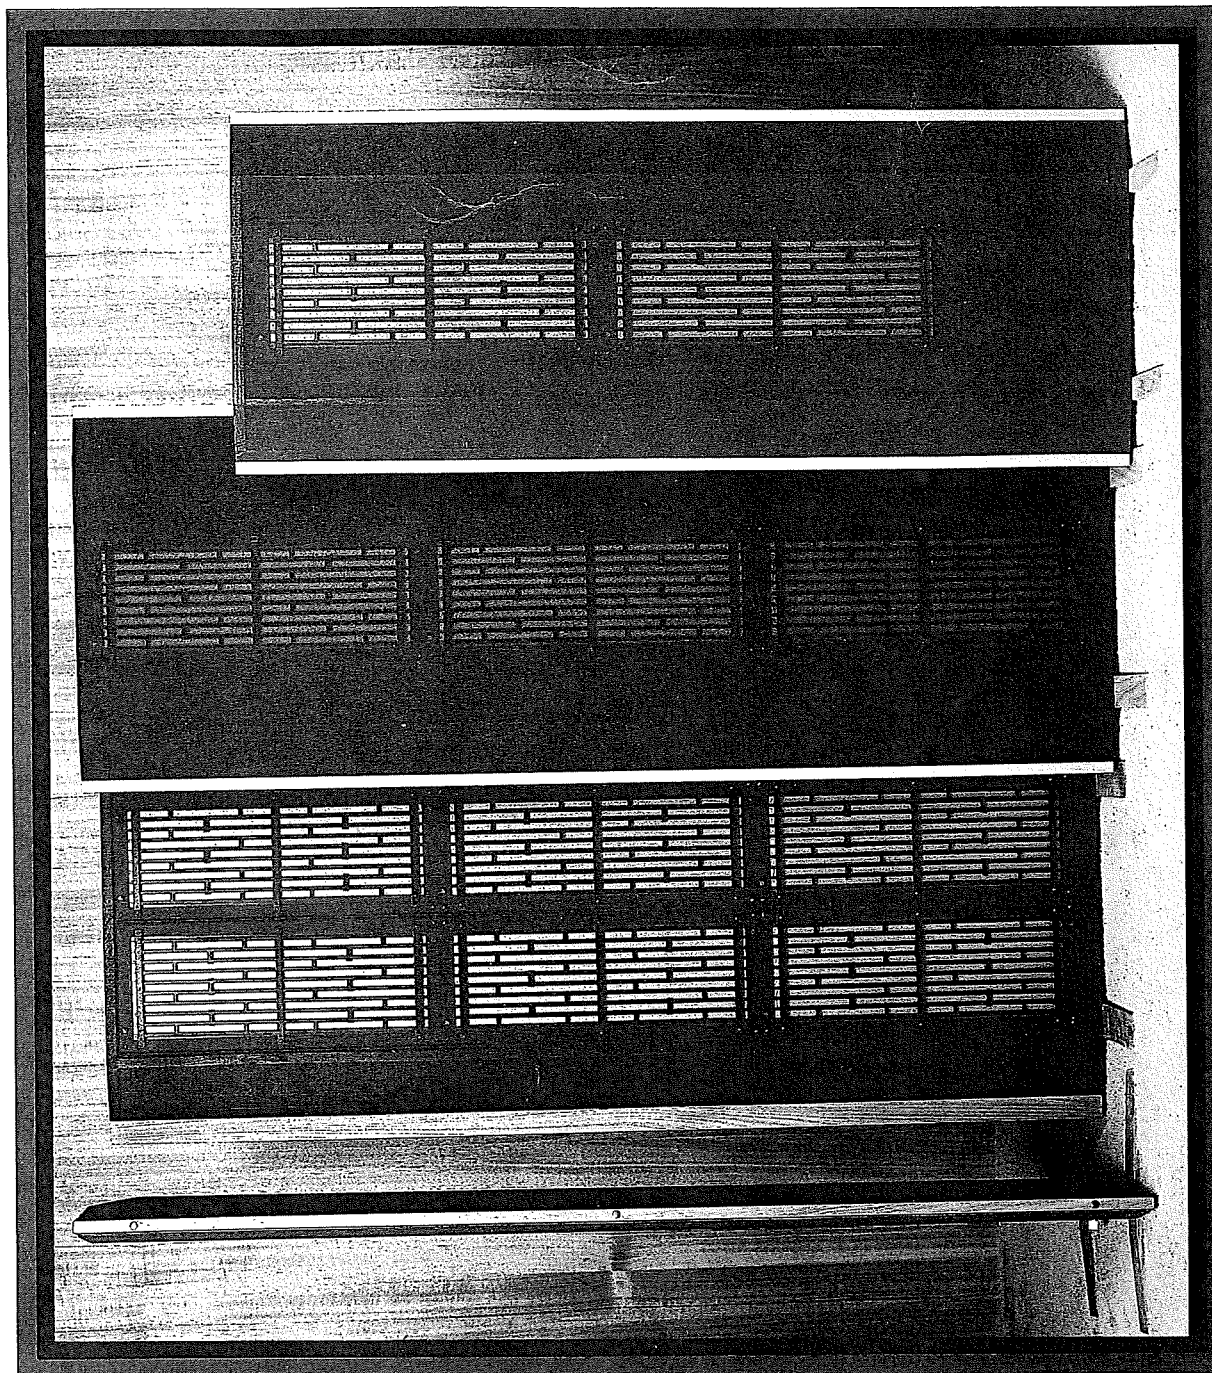

The IMAGE speaker reproduces music with astounding definition and transient clarity, while preserving all of the natural dynamic contrasts. In addition, the IMAGE is the first ribbon speaker to cover the bottom end with authority, converting your amplifier current into tight, powerful bass frequencies. The extremely low distortion of this ribbon design also enhances long-term listening enjoyment, forever ending "listener fatigue" associated with intermodulation.

The IMAGE configuration is of the dipolar radiating type, to avoid cabinet resonances which are difficult to control in conventional enclosures. The drivers are arranged in a line-source array, producing outstanding dispersion and perspective. All drivers are assembled in our factory to maintain 100% quality control. The appearance is elegant, with the center section covered in black grille cloth, trimmed with richly finished walnut. Optional cloth colors and wood trim are available.

For optimum performance with superb transient response and articulate bass, we strongly recommend that IMAGE speakers be driven by an amplifier capable of high-current power, such as our NOBLE or FORTE amplifiers, to give the "ultimate listening experience".

MODEL	FREQUENCY RESPONSE	NUMBER OF ELEMENTS	MINUM POWER	NOMINAL IMPEDENCE	SIZE	WEIGHT
IMAGE 1	30hz-20khz	9	50 watts	1.9 ohms	36" x 72" x 2 1/2"	150 lbs. each
IMAGE 2	35hz-20khz	6	75 watts	2.8 ohms	32" x 72" x 2 1/2"	125 lbs. each
IMAGE 5	40hz-20khz	3	75 watts	5.7 ohms	27" x 72" x 2 1/2"	64 lbs. each
IMAGE 4	50hz-20khz	2	75 watts	3.8 ohms	24" x 60" x 2 1/2"	50 lbs. each
