

THE REVISED PC AMPLIFIERS USED A TYPE 12AX7 PHASE INVERTER TUBE IN PLACE OF THE 6SL7. ALSO, ITEM 16 WAS DELETED; THE VALUE OF THE 3.9K FEEDBACK RESISTOR (ONE OF 3 UNDER ITEM No. 18) WAS INCREASED TO 39K AND CONNECTS FROM THE 16 Ω OUTPUT ON THE OUTPUT TRANSFORMER TO THE CATHODE OF THE INPUT HALF OF THE PHASE INVERTER.
