Rev 0.0 MAY 92	See 10PS2D for "original" version
Rev 1.0 MAR 95	10B–BBSB Summing amp added, 2 Way Mono mode replaced by Common Low Pass mode
Rev 1.1 MAR 96	Corrected error: C8 was incorrectly labelled 3n3 for SUB version & 4n7 for STD version when in fact it is the opposite.
Rev 2 AUG 2001	Low pass output stage made identical to High pass output stage to allow gain to be added so that attenuator could be inserted in either LP or HP signal path.
