

**It Took Eleven Years and One Night to Design
The World's Best Speaker System
The New CITATION X by Harman-Kardon**

The Man

Donald Harman, founder of Harman-Kardon, has been involved in the design of audio equipment since 1946. He has designed and produced a wide variety of products, including vacuum tubes, power supplies, and electronic components. His work has been recognized by numerous awards and publications. He is a member of the Audio Engineering Society and the Acoustical Society of America.

The Loudspeaker

The main speaker of the Citation X is the Lautsprecher model and the tweeter is the Treble model. Both speakers are made of wood, with two 12-inch drivers each. The tweeter is a small, low-power driver.

The Driver

The main speaker of the Citation X is the Lautsprecher model and the tweeter is the Treble model. Both speakers are made of wood, with two 12-inch drivers each. The tweeter is a small, low-power driver.

The Cabinet

The cabinet of the Citation X is made of wood, with two 12-inch drivers each. The tweeter is a small, low-power driver.

The Components

The components of the Citation X are made of wood, with two 12-inch drivers each. The tweeter is a small, low-power driver.

The Price

The price of the Citation X is \$500.00

Technical Specifications

The Citation X is a high-fidelity speaker system, featuring a 12-inch woofer and a 1-inch tweeter. The frequency response is 20 Hz to 20 kHz, with a maximum output of 100 watts. The crossover point is 3 kHz. The speaker is designed to be used with a power amplifier.

Conclusion

The Citation X is a high-fidelity speaker system, featuring a 12-inch woofer and a 1-inch tweeter. The frequency response is 20 Hz to 20 kHz, with a maximum output of 100 watts. The crossover point is 3 kHz. The speaker is designed to be used with a power amplifier.
