

outer ring, uses A5 (a bit small) or A4 (need to be real lean)

Glue to a piece of cardstock (old album cover, cereal box...)

Cut-out hole in middle to fit over phase plug and centre template

Linear pattern... glue ends together to make a cylinder and place over phase plug for inner pattern.

Use inner pattern for phase plug template (a ring just at or above at rest voice coil position)

## EnABL patterns for CSS FR/WR125

If pattern doesn't quite fit due to printer differences, print at slight reduction or magnification. Patterns can be scaled for other drivers
