

## ***OUTSTANDING FEATURES OF THE NEW CITATION B***

- Carefully regulated heavy duty power supply (full wave bridge design) assures absolute stability and extended low frequency response.
- Computer grade “Callins” electrolytic and coupling capacitors with ten year service guarantee.
- Instrument type speaker binding posts.
- Hermetically sealed computer grade silicon output devices deliver exceptionally wide frequency response at full power output with low distortion.
- Metered output circuit with idling current adjustments located on front panel.
- Absolutely fail-safe operation with all types of speaker loads. Amplifier can take high power transient, short circuit or unloaded condition without damage to output stage.
- Perfect square wave response throughout entire audible spectrum — better than 1 microsecond rise time.
- Laced military wiring harness connects all stages.
- Unconditional TWO YEAR service warranty on all parts including output transistors.
