STEREO CONTROL AMPLIFIER

C-90a

MODEL C-90a HAS THREE VERSIONS:

Type	Power requirement	Export destination
HE	AC220V,240V (Switchable)*	European continent
HB	AC220V,240V (switchable)*	United Kingdom
HEZ	AC220V,240V (switchable)*	West Germany

* Change the primary wiring of the power transformer.

- This manual is applicable to the C-90a/HE,HB and HEZ types.
- For the HB and HEZ types, refer to page25.

1. EXPLODED VIEWS AND PARTS LIST

NOTES:

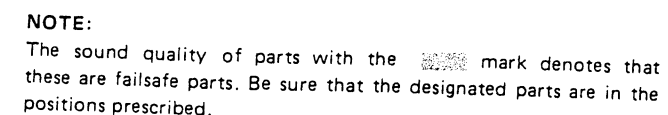

- Parts without part number cannot be supplied.
- The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "◎" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

3. ELECTRICAL PARTS LIST

NOTES:

- Parts without part number cannot be supplied.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
- The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex. 1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J = 5%, and K = 10%).

560Ω	56 × 10 ¹	561.....	RD1/4PS	⊙	⊙	⊙	J
47kΩ	47 × 10 ³	473.....	RD1/4PS	⊙	⊙	⊙	J
0.5Ω	0R5.....		RN2H	⊙	⊙	⊙	K
1Ω	010.....		RS1P	⊙	⊙	⊙	K

Ex. 2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62kΩ	562 × 10 ¹	5621.....	RN1/4SR	⊙	⊙	⊙	F

6. FOR HB AND HEZ TYPES

NOTES:

- Parts without part number cannot be supplied.
- The \triangle mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "●" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

CONTRAST OF MISCELLANEOUS PARTS

The C-90a/HB and HEZ types are the same as the C-90a/HE type with the exception of the following sections.

7. PANEL FACILITIES

FRONT PANEL

POWER switch/indicator

Press this switch to turn this unit's power ON/OFF. When you switch the unit ON, the muting function will be activated, and the indicator will flash. Once the flashing indication changes to a steady indication, the unit will operate normally.

VOLUME control

Use to adjust the sound volume. At the [∞] position, sound will not be heard, while at the [0] position, sound volume will be at its maximum.

MUTING switch/indicator

Use to temporarily -20 dB audio signals. When this switch is pressed so that the indicator lights, the muting circuit operates to reduce the level of all audio signals by 20 dB. When set to the OFF position, the volume is returned to its previous level.

INPUT SELECTOR switch/indicator

Use to select playback audio components (indicator lights).

- [CD]— Compact disc player.
- [Phono]— Stereo turntable.
- [Tuner]— Tuner for listening to FM/AM broadcasts.
- [TAPE 1]— The tape deck connected to the rear panel Tape 1 terminals.
- [TAPE 2]— The tape deck connected to the rear panel Tape 2 terminals.
- [AUX 1]— The audio component connected to the rear panel AUX 1 terminals.
- [AUX 2]— The audio component connected to the rear panel AUX 2 terminals.
- [AUX 3]— The audio component connected to the rear panel AUX 3 terminals.

ADAPTOR switch/indicator

Normally, set this switch OFF. Set to ON when using a surround processor or graphic equalizer connected to the rear panel adaptor terminals ADAPTOR IN/OUT.

BALANCE control

Normally, leave in the center position; use it to adjust the right-left sound volume when it seems to be unevenly balanced. When the sound is too loud on the right side, turn the control in the LEFT direction; when too loud on the left side, turn the control in the RIGHT direction.

Method of opening cover

TAPE COPY switch/indicator

Use this switch when you are using two tape decks and copying one tape to another tape.

[1 ► 2]— When copying a tape in the tape deck connected to the TAPE 1 PLAY terminals to the tape deck connected to the TAPE 2 REC terminals.

[2 ► 1]— When copying a tape in the tape deck connected to the TAPE 2 PLAY terminals to the tape deck connected to the TAPE 1 REC terminals.

HIGH FILTER switch/indicator

When this switch is pressed to the ON position, the indicator lights and a high-cut filter (cutoff frequency 10 kHz) is activated.

PHONO SELECTOR switch/indicator

Set in accordance with the type of cartridge used on your turntable (the corresponding indicator will light).

[MM]— Set here when using a moving magnet cartridge, or a high-output (1mV or more) moving coil (MC) cartridge.

[MC 40 Ω]— Set here when using a moving coil cartridge with impedance of 40 Ω .

[MC 3 Ω]— Set here when using a MC cartridge with impedance of 3 Ω .

**MODE switch/indicator**

Use to select the stereo or monaural audio playback mode. Normally, this switch is not used.

When the monaural playback mode is selected, press this switch; the MODE MONO indicator will light.

SUBSONIC FILTER switch/indicator

When this switch is pressed to the ON position, the indicator lights and a subsonic filter (cutoff frequency 7 Hz) is activated. Use to remove low-frequency noise due to warped records, etc.

Tone controls

These controls can be used only when the TONE indicator is lighted.

[BASS]— Use to adjust low-frequency sounds. The center indicates the standard (flat) position. When the control is rotated to the right, low-frequency sounds are augmented; when rotated to the left, low-frequency sounds are attenuated.

[TREBLE]— Use to adjust high-frequency sounds. The center indicates the standard (flat) position. When the control is rotated to the right, high-frequency sounds are augmented; when rotated to the left, high-frequency sounds are attenuated.

TONE switch/indicator

[ON]— The TONE indicator lights, and audio inputs from all components are played back after passing through the tone control circuits. In this condition, the tone controls (BASS, TREBLE) can be used to adjust sound quality.

[OFF]— The TONE indicator goes out, and signals are played back without passing through the tone control circuits.

LOUDNESS switch/indicator

Use this switch when you wish to listen at low volume. Normally, leave it OFF.

When you turn this switch ON (indicator lights), the bass and treble will be accentuated, providing dynamic reproduction even at low volume.

REAR PANEL

NOTE:

The PHONO terminals are provided with shorting pin plugs (two). Before connecting equipment to these terminals, therefore, remove the shorting pin plugs and insert them into unused INPUT terminals.

Ground (GND) terminal

Connect to the ground terminal of your turntable.

Playback component terminals

[PHONO]—Stereo turntable
[CD]—Compact disc player
[TUNER]—Tuner
[AUX 1]
[AUX 2] } Auxiliary terminals
[AUX 3]

ADAPTOR terminals

Use to connect a surround processor, graphic equalizer, or PCM adaptor.

OUTPUT terminals

Connect to the control amplifier input terminals of power amplifier.

Tape deck terminals

[TAPE 1]—Tape deck 1 (first deck)

PLAY: For playback (connect to the tape deck's PLAY terminals)

REC: For recording (connect to the tape deck's REC terminals)

[TAPE 2]—Tape deck 2 (second deck)

Power cord

Connect to a household wall outlet, or the power outlet of an audio timer.

AC OUTLETS (SWITCHED)

Power supplied through these outlets is turned on and off by this equipment's POWER switch. Total electrical power consumption of connected equipment should not exceed 250 W.

AC OUTLETS (UNSWITCHED)

Power flows continually to this outlet, regardless of whether this equipment is switched ON or OFF. Electrical power con-

sumption of connected equipment should not exceed 250 W.

The equipment should be disconnected by removing the mains plug from the wall socket when not in regular use, e.g. when on vacation.

NOTE:

Do not connect appliances with high power consumption such as heaters, irons, or television sets to the AC OUTLETS in order to avoid overheating or fire risk.

This can cause this equipment to malfunction.

MAINTENANCE OF EXTERNAL SURFACES

- Use a polishing cloth or dry cloth to wipe off dust and dirt.
- When the surfaces are very dirty, wipe with a soft cloth dipped in some neutral cleanser diluted five or six times with water, and then wipe again with a dry cloth. Do not use furniture wax or cleaners.
- Never use thinners, benzene, insecticide sprays and other chemicals on or near this unit, since these will corrode the surfaces.

Precautions for installation

To ensure optimum sound quality, observe the following precautions.

- This unit is heavy. Be sure to install it on a firm base which can support its weight. Also, to prevent the flow of cooling air from being blocked off, do not place the unit on soft material such as a carpet or cushion, or install it in a confined space. When installing the unit in a rack, provide adequate space around it to allow heat to dissipate.
- To prevent the control amplifier from picking up noise due to leakage flux from the power amplifier when the control amplifier and power amplifier are installed adjacent to each other, install the control amplifier on the right of the power amplifier. Also, if you install the control amplifier above or below the power amplifier, place a partition between them to separate them by at least 10 cm from each other.
- Install the unit on a level surface so that the feet of the unit are all touching the installation surface.
