

A pre-finished compact speaker system kit anyone can assemble in less than 20 minutes without tools. No sanding, no finishing, no special manual skills. And it looks and sounds like a much more expensive factory-built system!

NEW E-V

CORONET KIT SPEAKER SYSTEM ONLY \$39⁰⁰*

Comes like this . . . looks like this . . . sounds great!

Here's a kit speaker system that goes together virtually by the power of your suggestion alone!

And inside (you'll know it because you'll put it there) is an authentic component-quality speaker—the MC8 full-range, 8-inch speaker made by Electro-Voice. A heavy die-cast frame. Radax dual-cone construction and a modern ceramic magnet distinguish the E-V MC8 from the ordinary "radio-set" speakers found in most kits. The MC8 is actually made by the same craftsmen as the most expensive E-V speakers!

The E-V Coronet's 3/4-inch Acoustiply panels are completely finished in oiled walnut veneers. You'll see at once they aren't made of lightweight, raw wood like so many kits. And the design, an acoustical phase inverter, was developed only after exhaustive tests in the E-V laboratories—by engineers devoted solely to the improvement of loudspeaker and enclosure design.

But the best news of all about the Coronet is the price*: just \$39.00, net, for the basic Coronet I (with MC8 loudspeaker, 50-13,000 cps); \$43.50, net, for the Coronet II (with LS8 loudspeaker, 45-14,000 cps); and \$54.00, net, for the Coronet III (with SP8B loudspeaker, 40-15,000 cps).
