## SPECIFICATIONS

### FRONT AMP SECTION

	Nominal	Limit
Continuous Power Output (STEREO MODE), Input: CD	≥70W	≥65W
THD: 0.08%, 8ohms		
Both Channel Driven (20Hz - 20KHz) (STEREO MODE)	≥95W	≥90W
THD: 0.2%, 4ohms, Input: CD		
Both Channel Driven (20Hz - 20KHz)		
THD at 65W, 8ohms, Input: CD		
20Hz	≤0.05%	≤0.08%
1KHz	≤0.05%	≤0.08%
20KHz	≤0.05%	≤0.08%
IM Distortion at 50W, 8ohms,		
	≤0.05%	≤0.08%
Input Sensitivity for Rated Power Output (65W)		
Tape Monitor/ CD/ AUX/ TAPE2	200mV	150-250mV
Phono	2.5mV	2.2-2.8mV
S/N Ratio Input Shorted at 1KHz 70W Output (WTD IHF-A)		
CD	≥100dB	≥95dB
Tone Control		
Bass: 100Hz	+10dB	+10±2dB
	-10dB	-10±2dB
Treble: 10Hz	+10dB	+10±2dB
	-10dB	-10±2dB
Frequency Response at -3dB		
Mode: Stereo, Ref: 1KHz, 10Hz-120KHz 15Hz-100KHz		
Channel Crosstalk Input Shorted by 1Kohms		
100Hz	≥60dB	≥52dB
1KHz	≥60dB	≥52dB
10KHz	≥50dB	≥42dB

### GENERAL

	Nominal	Limit
Power Consumption		
At Rated Power All Channel Driven		
USA/Canada	332W	160-200W
Europe	332W	400-500W
Idling at Minimum Volume Control		
USA/Canada	72W	20-40W
Europe	72W	50-90W
Power Supplies:		
USA/Canada	AC120V, 60Hz	
Europe	AC230V, 50Hz	
Dimensions (W×H×D)		
inches	17.4×6.1×16.3	
mm	442×156×415	
Weight(lbs/ kgs)	24.6/ 11.2	

### FM SECTION

	Nominal	Limit
Tuning Cover Range		
USA/ Canada: 100KHz STEP	87.50-108.00MHz	
Europe : 50KHz STEP	87.50-108.00MHz	
Mono Usable Sensitivity(75ohms Input, 98MHz)	≤12.2dbf	≤17.3dbf
Image Rejection (at 98MHz)		
USA/Canada	≥40dB	≥35dB
Europe	≥70dB	≥65dB
IF Rejection (at 98MHz)	≥80dB	≥70dB
50dB Quieting Sensitivity (at 98MHz, 100% MOD.)		
IHF Band Pass Filter		
Stereo	≤41.2dbf	≤47.3dbf
Distortion (1KHz, 100% MOD. at 98MHz, 65dbf Input)		
IHF Band Pass Filter		
Mono	≤0.3%	≤0.5%
S/N Ratio (500 Input, 100% MOD. at 98MHz)		
IHF Band Pass Filter		
Stereo	≥65dB	≥60dB
Frequency Response(-3dB)		
USA/Canada De-Emphasis: 75μs	20Hz-15KHz	40Hz-14KHz
Europe De-Emphasis: 50μs	20Hz-15KHz	40Hz-14KHz
AM suppression at 98MHz		
	≥52dB	≥47dB
Muting threshold (at 98MHz)	35.2dbf	31.2-39.2dbf
Overload Distortion at 98MHz	0.3%	1%
Capture Ratio at 65dbf	≤1.5dB	≤2.5dB
Stereo Separation (at 98MHz, 100% MOD., 500μV Input)		
IHF Band Pass Filter	≥40dB	≥30dB
1KHz		
Tape out Level (at 98MHz)	500mV	350-650mV

### AM SECTION

	Nominal	Limit
Tuning Cover Range (MW)		
USA/ Canada: 10KHz STEP	520-1710MHz	
Other : 9KHz STEP	522-1611MHz	
Usable Sensitivity		
999/990KHz	≤500μV/m	≤1000μV/m
Image Rejection (at 999KHz)	≥35dB	≥30dB
AGC Figure of Merit (From 100mV/m at 999/1000KHz)		
	≥55dB	≥50dB
Distortion (999/1000Hz, 30% MOD. 50mV/m Input)		
	≤1.0%	≤1.5%
Frequency Response (999/1000KHz) at -6dB	80Hz-2.3KHz	100Hz-2KHz
Selectivity (at 999/1000Hz)		
9KHz/ 10KHz	≥25dB	≥20dB
S/N Ratio (999/1000KHz, With Antenna Input 50mV/m)	≥40dB	≥35dB
Overload Distortion at 999/1000KHz		
	≥1%	≥1.5%
TAPE Output Level at 999/1000KH (5mV/m Input)		

## ELECTROSTATICALLY SENSITIVE (ES) DEVICES

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any electrostatic charge on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging wrist strap device, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charge sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material.)
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

**CAUTION:** Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity sufficient to damage an ES device.)

## PRODUCT SAFETY NOTICE

Each precaution in this manual should be followed during servicing.

Components identified with the IEC symbol  in the parts list are of special significance to safety. When replacing a component identified with , use only the replacement parts designated, or parts with the same ratings or resistance, wattage, or voltage that are designated in the parts list in this manual.

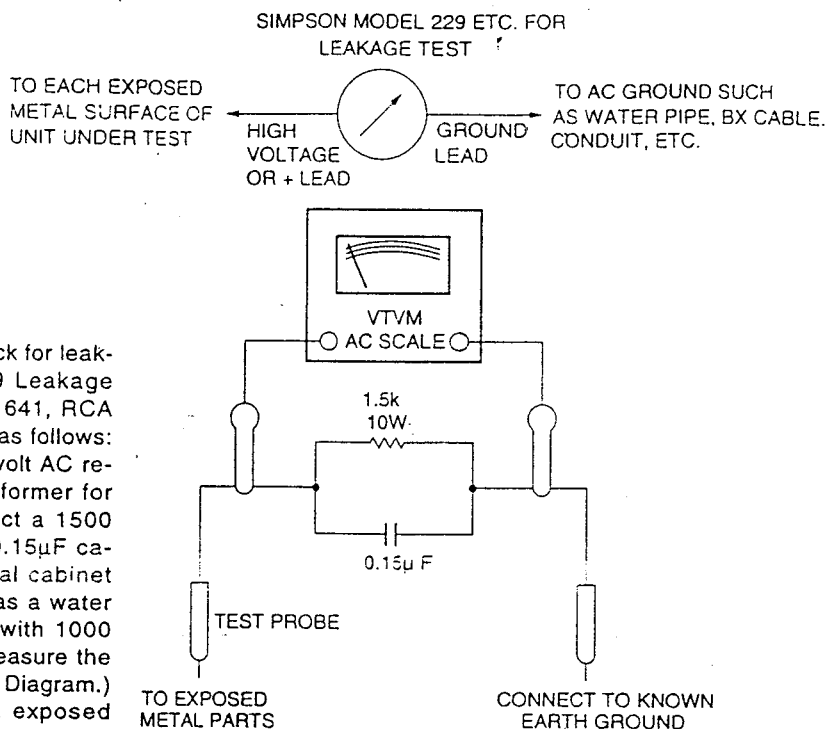

Leakage - current or resistance measurements must be made to determine that exposed parts are acceptably insulated from the supply circuit before returning the product to the customer.

## LEAKAGE TEST (FOR SERVICE ENGINEERS IN THE U.S.A.)

Before returning the unit to the user, perform the following safety checks:

1. Inspect all lead dress to make certain that leads are not pinched or that hardware is not lodged between the chassis and other metal parts in the unit.
2. Be sure that any protective devices such as nonmetallic control knobs, insulating fishpapers, cabinet backs, adjustment and compartment covers or shields, isolation resistor-capacity networks, mechanical insulators, etc. Which were removed for servicing are properly reinstalled.
3. Be sure that no shock hazard exists; check for leakage current using Simpson Model 229 Leakage Tester, standard equipment item No. 21641, RCA Model WT540A or use alternate method as follows: Plug the power cord directly into a 120-volt AC receptacle (do not use an Isolation Transformer for this test). Using two clip leads, connect a 1500 Ohm, 10-watt resistor paralleled by a  $0.15\mu\text{F}$  capacitor, in series with all exposed metal cabinet parts and a known earth ground, such as a water pipe or conduit. Use a VTVM or VOM with 1000 Ohms per volt, or higher sensitivity to measure the AC voltage drop across the resistor. (See Diagram.) Move the resistor connection to each exposed metal part having a return path to the chassis (antenna, metal, cabinet, screw heads, knobs and control shafts, escutcheon, etc.) and measure the AC voltage drop across the resistor. (This test should be performed with the power switch in both the On and Off positions.)

A reading of 0.35 volt RMS or more is excessive and indicates a potential shock hazard which must be corrected before returning the unit to the owner.

## ALIGNMENT PROCEDURES

HK3270/HK3270RDS

### 1. Test Equipment Required

- AM Standard Signal Generator (AM SSG)
- Oscilloscope
- AC Voltmeter
- FM Standard Signal Generator (FM SSG)
- Stereo Modulator
- Audio Generator
- Distortion Meter
- DC Voltmeter
- Frequency Counter

**Note:** Disconnect external FM antenna prior to alignment

### 2. Alignment and Test Points

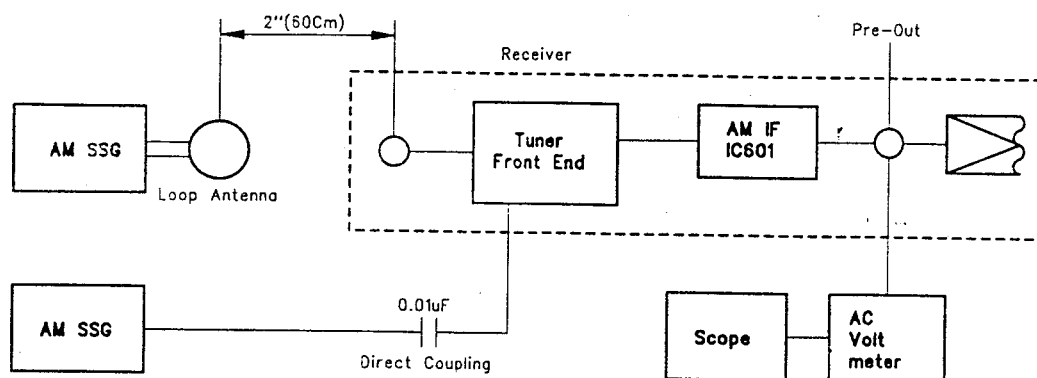

### 3. AM IF and RF Alignment

Preparation

1. Output of signal Generator should not be higher than necessary to obtain an optimum output reading.
2. Signal Generator Modulation: 30%
3. Switch: Press to AM.

Step	Signal Generator Frequency	Receiver Frequency on the Display	Equipment Connection	Adjustment Point	Adjust for
1	990KHz (400Hz, Mod.)	520KHz	DC Voltmeter TP601	T602	1.2V reading Maximum
2	600KHz (400Hz, Mod.)	600KHz	AC Voltmeter to TAPE OUT jack	T601	reading Maximum
3	1400KHz (400Hz, Mod.)	400KHz	AC Voltmeter to TAPE OUT jack	CT601	reading Maximum
4	990KHz (400Hz, Mod.)	990KHz	AC Voltmeter to TAPE OUT jack	T603	reading FL display "TUNED"
5	990KHz (400Hz, Mod.)	990KHz	Same as Step 1.	VR601	Indicator on receiver with AM SSG Output level of 800 $\mu$ V/m

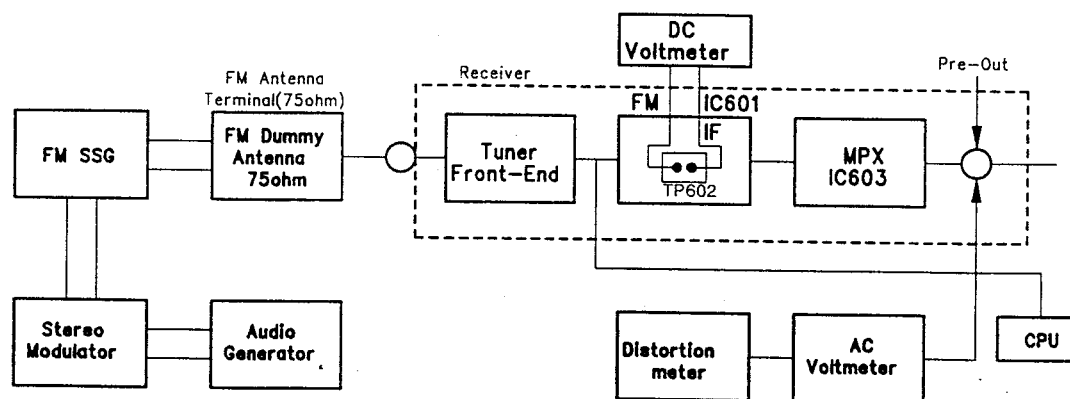

AM Alignment Connection

## 4. FM IF Alignment

## Preparation

1. Signal Generator output should be no higher than necessary to obtain an optimum output reading.
2. Switch Press to FM.
3. Signal generator deviation: 75KHz (HK3270) 40KHz (HK3270RDS)

Step	Signal Generator Frequency	Receiver Frequency on the Display	Equipment Connection	Adjustment Point	Adjust for
1	98.0MHz (1KHz, Mod.)	98.0MHz	DC Voltmeter to TP 602	T604	Zero reading on DC voltmeter
2	98.0MHz (1KHz, Mod.)	98.0MHz	Distortion meter to TAPE OUT jack	T605	Minimum distortion
3	98.0MHz (1KHz, Mod.)	98.0MHz	Same as Step 1	VR602	FL display "TUNED" Indication on receiver with FM SSG output level of 35.2 dbf

FM RF/IF and MPX Alignment Connection

## 5. MPX Alignment, SM Alignment

### Preparation

HK3270/HK3270RDS

1. Switch : Press to FM.
2. Tuner for 98MHz on band.
3. Signal Generator output level : 1000  $\mu$ V.
4. Deviation : 75 KHz (HK3270), 40 KHz (HK3270RDS) at 100% modulation of composite signal.
5. Connect Signal Generator to FM antenna terminal through FM dummy antenna (75  $\Omega$ ).

Step	19KHz Modulation Level	Signal Generator Frequency Setting	Equipment Connection	Adjustment Point	Adjust for
1	7.5KHz Mod.	Composite to channel 1KHz R	AC voltmeter to TAPE OUT jack of R channel	-	Adjust for about 450mV of audio output
2	7.5KHz Mod.	Composite to channel 1KHz L	AC voltmeter to TAPE OUT jack of R channel	VR603	AC voltmeter reading should be at least 40dBbeicw.
3	7.5KHz Mod.	Composite to channel 1KHz R	AC voltmeter to TAPE OUT jack of L channel	VR603	Same as Step 2.
If you could not obtain -40dB reading in Steps 2 and 3 (compared with Step 1), read just VR603 until you obtain -40dB readings for both steps 2 and 3. Nominal is -45dB.					

## Front Panel Controls

**1 Main Power Switch:** Press this button to apply power to the HK3270/HK3270RDS.

When the switch is pressed in the unit is placed in a Standby mode, as indicated by the amber LED **3** surrounding the **System Power Control** **2**. This button **MUST** be pressed in to operate the unit. To turn the unit off and prevent the use of the remote control, this switch should be pressed until it pops out from the front panel so that the word "OFF" may be read at the top of the switch.

NOTE: In normal operation this switch is left in the "ON" position.

**2 System Power Control:** When the Main Power Switch **1** is "ON", press this button to turn on the HK3270/HK3270RDS; press it again to turn the unit off. Note that the **Power Indicator** surrounding the switch **3** will turn green when the unit is on.

**3 Power Indicator:** This LED will illuminate in amber when the unit is in the Standby mode to signal that the unit is ready to be turned on. When the unit is in operation, the indicator will turn green. A red indicator means that the unit is in the Protect mode, and should be turned off and then checked for a possible speaker wire short circuit.

**4 Headphone Jack:** This jack may be used to listen to the HK3270/HK3270RDS's output through a pair of headphones. Be certain that the headphones have a standard 1/4" stereo phone plug.

**5 Speaker 1 Button:** Press this button to activate the speaker connected to the **Speaker 1** output terminals **16**.

**6 Speaker 2 Button:** Press this button to activate the speaker connected to the **Speaker 2** output terminals **17**.

**7 Bass Control:** Turn this control to modify the low-frequency output of the left/right channels by as much as  $\pm 10\text{dB}$ . Set this control to a suitable position for your taste and room acoustics.

**8 Treble Control:** Turn this control to modify the high-frequency output of the left/right channels by as much as  $\pm 10\text{dB}$ . Set this control to a suitable position for your taste and room acoustics.

**9 Balance Control:** Turn this control to change the relative volume for the front left/right channels.

**10 Phono Button:** Press this button to select the output of a turntable which is connected to the **Phono** inputs **6**.

**11 Tape Monitor:** Press this button to listen to the output of a tape recorder connected to the **Tape Monitor** inputs. A red LED indicator will illuminate above the button to indicate that the input source is being monitored when the HK3270/HK3270RDS is connected to a three head tape deck or another unit with off-head playback.

**12 Tape 2:** Press this button to listen to the output of a tape recorder or other device connected to the **Tape 2** inputs **11**.

**13 CD Button:** Press this button to listen to the output of a CD player connected to the **CD** inputs **7**.

**14 AUX Button:** Press this button to listen to the output of device connected to the **AUX** inputs **8**.

**15 AM Button:** Press this button to listen to radio stations in the AM (MW) frequency band.

**16 FM Button:** Press this button to listen to radio stations in the FM frequency band.

**17 Tuning Button:** Press the left side of the button to tune lower frequency stations and the right side of the button to tune higher frequency stations. When a station with a strong signal is tuned, the **TUNED** indicator will illuminate in the **Information Display** **24**. A brief (1/2 second) press of the button will manually tune to the next frequency increment, while pressing and holding the button for a longer period will automatically tune to the next station with a signal strong enough for acceptable reception.

**18 Preset Scan:** Press this button to automatically scan through the stations that have been programmed in the HK3270/HK3270RDS's memory. The tuner will play five seconds of each station before moving to the next preset station. To stop the scan when the desired station is heard, press the button again.

**19 Preset Stations Selector:** Press this button to select stations that have been entered into the preset memory.

**20 FM Mode:** Press this button to select the stereo or mono mode for FM tuning. In the **STEREO** mode a **Stereo** indicator will illuminate in the **Information Display** **24**, and stereo reception will be provided when stations are transmitting stereo signals. In the **MONO** mode the left and right signals from stereo broadcasts will be mixed together and reproduced through all channels. Select **MONO** for better reception of weak signals.

**21 Mute:** Press this button to momentarily silence the speaker output of the HK3270/HK3270RDS.

**22 Volume Control:** Turn the knob clockwise to increase volume, counterclockwise to decrease the volume.

**23 Volume/Mute Indicator:** This indicator will glow green when the HK3270/HK3270RDS is turned on. Its position will enable you to judge the relative volume of the unit even when the speakers are muted or turned off. When the indicator is pointing towards the left, at an "8 o'clock" position, the volume is low; when it is pointing to the right, as in a "3 o'clock" position, the volume is loud. When the unit has been muted, pressing the **Mute** button **21** the indicator will flash.

**24 Information Display:** This display delivers messages and status indications to help you operate the receiver.

**25 Remote Sensor Window:** The sensor behind this window receives infrared signals from the remote control. Aim the remote at this area and do not block or cover it unless an external remote sensor is installed.

## CONTROLS AND FUNCTIONS

### Front Panel Controls

**1 Main Power Switch:** Press this button to apply power to the HK3270/HK3270RDS.

When the switch is pressed in the unit is placed in a Standby mode, as indicated by the amber LED **3** surrounding the **System Power Control** **2**. This button MUST be pressed in to operate the unit. To turn the unit off and prevent the use of the remote control, this switch should be pressed until it pops out from the front panel so that the word "OFF" may be read at the top of the switch.

NOTE: In normal operation this switch is left in the "ON" position.

**2 System Power Control:** When the **Main Power Switch** **1** is "ON," press this button to turn on the HK3270/HK3270RDS; press it again to turn the unit off. Note that the **Power Indicator** surrounding the switch **3** will turn green when the unit is on.

**3 Power Indicator:** This LED will illuminate in amber when the unit is in the Standby mode to signal that the unit is ready to be turned on. When the unit is in operation, the indicator will turn green. A red indicator means that the unit is in the Protect mode, and should be turned off and then checked for a possible speaker wire short circuit.

**4 Headphone Jack:** This jack may be used to listen to the HK3270/HK3270RDS's output through a pair of headphones. Be Certain that the headphones have a standard 1/4" stereo phone plug.

**5 Speaker 1 Button:** Press this button to activate the speaker connected to the **Speaker 1** output terminals **16**.

**6 Speaker 2 Button:** Press this button to activate the speaker connected to the **Speaker 2** output terminals **17**.

**7 Bass Control:** Turn this control to modify the low-frequency output of the left/right channels by as much as  $\pm 10$ dB. Set this control to a suitable position for your taste and room acoustics.

**8 Treble Control:** Turn this control to modify the high-frequency output of the left/right channels by as much as  $\pm 10$ dB. Set this control to a suitable position for your taste and room acoustics.

**9 Balance Control:** Turn this control to change the relative volume for the front left/right channels.

**10 Phono Button:** Press this button to select the output of a turntable which is connected to the **Phono** inputs **6**.

**11 Tape Monitor:** Press this button to listen to the output of a tape recorded connected to the Tape Monitor inputs. A red LED indicator will illuminate above the button to indicate that the input source is being monitored when the HK3270/HK3270RDS is connected to a three head tape deck or another unit with off-head playback.

**12 Tape 2:** Press this button to listen to the output of a tape recorder or other device connected to the **Tape 2** inputs **11**.

**13 CD Button:** Press this button to listen to the output of a CD player connected to the **CD** inputs **7**.

**14 AUX Button:** Press this button to listen to the output of device connected to the **AUX** inputs **8**.

**15 AM Button:** Press this button to listen to radio stations in the AM (MW) frequency band.

**16 FM Button:** Press this button to listen to radio stations in the FM frequency band.

**17 Tuning Button:** Press the left side of the button to tune lower frequency stations and the right side of the button to tune higher frequency stations. When a station with a strong signal is tuned, the **TUNED** indicator will illuminate in the **Information Display** **24**. A brief (1/2 second) press of the button will manually tune to the next frequency increment, while pressing and holding the button for a longer period will automatically tune to the next station with a signal strong enough for acceptable reception.

**18 Preset Scan:** Press this button to automatically scan through the stations that have been programmed in the HK3270/HK3270RDS's memory. The tuner will play five seconds of each station before moving to the next preset station. To stop the scan when the desired station is heard, press the button again.

**19 Preset Stations Selector:** Press this button to select stations that have been entered into the preset memory.

**20 FM Mode:** Press this button to select the stereo or mono mode for FM tuning. In the STEREO mode a **Stereo** indicator will illuminate in the **Information Display** 24, and stereo reception will be provided when stations are transmitting stereo signals. In the MONO mode the left and right signals from stereo broadcasts will be mixed together and reproduced through all channels. Select MONO for better reception of weak signals.

**21 Mute:** Press this button to momentarily silence the speaker output of the HK3270/ HK3270RDS.

**22 Volume Control:** Turn the knob clockwise to increase volume, counterclockwise to decrease the volume.

**23 Volume/ Mute Indicator:** This indicator will glow green when the HK3270/ HK3270RDS is turned on. Its position will enable you to judge the relative volume of the unit even when the speakers are muted or turned off. When the indicator is pointing towards the left, at an "8 o'clock" position, the volume is low; when it is pointing to the right, as in a "3 o'clock" position, the volume is loud. When the unit has been muted, pressing the **Mute** button 21 the indicator will flash.

**24 Information Display:** This display delivers messages and status indications to help you operate the receiver.

**25 Remote Sensor Window:** The sensor behind this window receives infrared signals from the remote control. Aim the remote at this area and do not block or cover it unless an external remote sensor is installed.

## Rear Panel Connections

**1 AM Antenna:** Connect the AM loop antenna supplied with the receiver to these terminals. If an external AM antenna is used, make connections to the **AM** and **GND** terminals in accordance with the instructions supplied with the antenna.

**2 FM Antenna:** Connect an indoor or external FM antenna to this terminal.

**3 Phono Ground:** Connect the ground wire from a turntable to this terminal to reduce system hum.

**4 Remote IR In:** If the HK3270/HK3270RDS front panel IR sensor is blocked due to cabinet doors or other obstructions, an external IR sensor may be used. Connect the output of the sensor to this jack.

**5 Remote IR Out:** This connection permits the IR sensor in the receiver to serve other remote controlled devices. Connect this jack to the "IR IN" jack on Harman Kardon or other compatible equipment.

**6 Phono Inputs:** Connect the outputs of your turntable or tone arm to these jacks. Note that only Moving Magnet (MM) type cartridges may be used.

**7 CD Inputs:** Connect these jacks to the output of a compact disc player or CD changer.

**8 Aux Inputs:** Connect these jacks to the line-level output of any audio device such as a TV, cable converter or portable audio player.

**9 Tape Monitor Play/In:** Connect these jacks to the Play/Out jacks of an audio recorder.

**10 Tape Monitor Record/Out:** Connect these jacks to the Rec/In jacks of an audio recorder.

**NOTE:** When these jacks are connected to a three-head recorder or another device with off-head playback, it will be possible to monitor the source being recorded.

**11 Tape 2 Play/In:** Connect these jacks to the PLAY/OUT jacks of a second audio recorder.

**12 Tape 2 Record/Out:** Connect these jacks to the Rec/In jacks of a second audio recorder.

**13 Main In:** These jacks are the input to the HK3270/HK3270RDS's power amplifier. Unless an external power amplifier is used, the jumper pins should remain connected to the **Preamp Out** jacks **14**.

**14 Preamp Out:** These jacks provided an output for the left and right channels to an optional external amplifier. In normal operation, unless an external power amplifier is used, the jumper pins should remain connected to the **Main In** jacks **13**.

**15 Subwoofer Out:** Connect these jacks to the line level input of a powered subwoofer. If an external subwoofer amplifier is used, connect this jack to the subwoofer amplifier input.

**16 Speaker 1 Terminals:** Connect these terminals to the appropriate terminals on your speakers.

**17 Speaker 2 Terminals:** Connect these terminals to the appropriate terminals on your speakers.

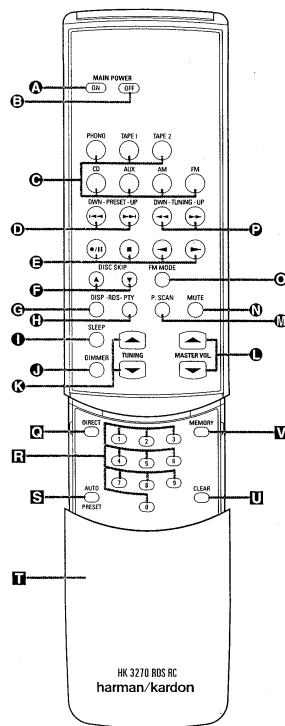

**18 Accessory Outlets:** These outlets may be used to power low-current draw devices such as CD players or cassette decks. Note that the power to these outlets will remain on as long as the **Main Power Switch 1** is pressed in. These outlets will continue to be powered even when the unit is in the Standby mode. To remove power to these outlets, the **Main Power Switch 1** must be placed in the OFF position.

**NOTE:** The power consumption of the devices plugged into these outlets should not exceed 100 watts.

**19 Power Cable:** Connect the AC plug to a non-switched AC wall output.

## Remote Control Functions

HK3270/HK3270RDS

**A Main Power On:** When the HK3270/HK3270RDS is in the Standby mode, as indicated by the Power Indicator glowing amber, press this button to turn the HK3270/HK3270RDS on.

**B Main Power Off:** When the HK3270/HK3270RDS is turned on, press this button to place it in the Standby mode. Note that in this condition, the unit is still connect to AC Power.

**C Source Selectors:** Press these buttons to select an input source for the HK3270/HK3270RDS.

**D Preset Up/Down:** When the tuner is in use, these buttons scroll through the stations that have been programmed into the HK3270/HK3270RDS's memory. These buttons also control the track Skip Up and Down on compatible Harman Kardon compact disc players/ changers.

**E Transport Controls:** These buttons are used to control Play, Play Forward, Play Reverse, Stop, Pause and Record functions on compatible Harman Kardon compact disc players/ changers and cassette tape decks.

**F Disc Skip:** These buttons do not have any functions when controlling the HK3270/HK3270RDS, but they operate the Disc Skip functions of compatible Harman Kardon compact disc changers.

**G RDS Display Button:** Press this button to view the various displays of the RDS options that are available when a station is transmitting RDS data.

**H RDS PTY Button:** Press this button to start a search for a specific PTY type using the RDS capabilities of the HK3270 RDS.

**I Sleep Button:** Press this button to place the unit in the Sleep mode. After the time shown in the display, the HK3270/HK3270RDS will automatically go into the Standby mode. Each press of the button changes the time until turn-off in the following order:

**J Dimmer:** Press this button once to reduce the brightness of the front panel display to half the normal intensity. Press it again to turn the front panel display completely off. When the display is completely off, press the button to return to normal brightness.

**K Tuning:** Press these buttons to tune up or down through a selected frequency band.

**L Master Volume:** Press these buttons to raise or lower the HK3270/HK3270RDS's volume.

**M P-Scan:** Press this button to automatically scan through the list of stations that are programmed into the HK3270/HK3270RDS's tuner memory. When the button is pressed, each preset station will play for five seconds before the next station is selected. Press the button again when the desired station is heard to stop the preset scan.

**N Mute:** Press this button to momentarily silence the HK3270/HK3270RDS.

**O FM Mode:** Press this button when the tuner is in use in the FM band to switch to monaural reception if the station is weak and noisy. When the MONO indicator is on, FM reception will be monaural regardless of the strength of the tuned FM station.

**P Tuning Up/Down:** When the tuner is in use, these buttons will tune up or down through the selected frequency band. A brief (1/2 second) press of the button will manually tune to the next frequency increment, while pressing and holding the button for a longer period will automatically tune to the next station with a signal strong enough for acceptable reception. These buttons will also control Fast Forward and Fast Reverse (or Rewind) for compatible Harman Kardon compact disc players/ changers and cassette tape decks.

**Q Direct:** Press this button to select a radio station by entering its frequency using the Numeric Keys R.

**R Numeric Keys:** These buttons serve as a ten-button numeric keypad to enter tuner preset positions.

**S Auto Preset:** When the tuner and FM band have been selected, this button may be used to automatically program the tuner presets for all active stations. To start the auto preset scan, press and hold the button. Note that the MEMO and PRESET indicators will flash. After a few seconds, the tuner will start to "look" for active stations, as shown by increasing frequency numbers in the Information Display. Release the button and note that the tuner will briefly stop at each active station and add a preset number to the memory. If the FM tuner found less than 30 FM stations with acceptable signal strength, the Auto Preset tuning will scan two more cycles or until the remaining vacant preset memory spaces have been filled with those found in the first scan. The scan will stop when all 30 preset memory spaces have been filled or when three scans through the band have been completed.

**T Secondary Control Cover:** This sliding cover normally is in the "up" position so that it hides the secondary controls. To access these controls, place your thumb on the small recessed area at the top center of the cover and, gently press the cover down and towards you.

**U Clear Button:** This button is used to clear preset memory information for the HK3270/HK3270RDS's tuner.

**V Memory:** Press this button to open a memory position that stores a preset location for the HK3270/HK3270RDS's tuner.

## Remote Control Functions

**A Main Power On:** When the HK3270/ HK3270RDS is in Standby mode, as indicated by the Power Indicator glowing, press this button to turn the HK3270RDS on.

**B Main Power Off:** When the HK3270/ HK3270RDS is on, press this button to place the unit in Standby mode. Note that in Standby mode, the unit is still consuming a small amount of power.

**C Source Selectors:** Press these buttons to select an input source for the HK3270/ HK3270RDS.

**D Preset Up/ Down:** When the HK3270/ HK3270RDS is in use, these buttons select the stations that have been programmed into the HK3270RDS's memory. They also control the track Skip function on compatible Harman Kardon compact disc players/ cassettes.

**E Transport Controls:** These buttons are used to control the transport functions: Forward, Play, Reverse, Stop, and Record functions on compatible Harman Kardon compact disc players/ cassettes.

**F Disc Skip:** These buttons have any functions when the HK3270/ HK3270RDS is used to operate the Disc Skip function on compatible Harman Kardon compact disc players/ cassettes.

**G RDS Display Button:** Press this button to view the various RDS options that are available when a station is transmitting RDS data.

**H RDS PTY Button:** Press this button to start a search for a station using the RDS category (PTY) function on the HK3270 RDS.

**I Sleep Button:** Press this button to place the unit in the Sleep mode. The time shown in the display will automatically go into the Sleep mode. Each press of the button changes the time until the following order:

When the RDS is in the indicated by the ring amber, press the HK3270/

When RDS is turned on, place it in the that in this till connect to AC

s: Press these buttons to select the input source for RDS.

1: When the tuner buttons scroll through the HK3270/ try. These buttons Skip Up and Harman Kardon / changers.

ols: These buttons: Play, Play, Stop, Pause, and on compatible compact disc players/ cassette tape decks.

buttons do not when controlling RDS, but they functions of Harman Kardon compact

tion: Press this button to select the various displays of are available when RDS is transmitting

1: Press this button for a specific PTY capabilities of the

Press this button to enter sleep mode. After the display, the S will be in Standby the button will turn-off in the

**Dimmer:** Press this button once to reduce the brightness of the front panel display to half the normal intensity. Press it again to turn the front panel display completely off. When the display is completely off, press the button to return to normal brightness.

**Tuning:** Press these buttons to tune up or down through a selected frequency band.

**Master Volume:** Press these buttons to raise or lower the HK3270/ HK3270RDS's volume.

**P - Scan:** Press this button to automatically scan through the list of stations that are programmed into the HK3270/ HK3270RDS's tuner memory. When the button is pressed, each preset station will play for five seconds before the next station is selected. Press the button again when the desired station is heard to stop the preset scan.

**Mute:** Press this button to momentarily silence the HK3270/ HK3270RDS.

**FM Mode:** Press this button when the tuner is in use in the FM band to switch to monaural reception if the station is weak and noisy. When the MONO indicator is on, FM reception will be monaural regardless of the strength of the tuned FM station.

**Tuning Up/Down:** When the tuner is in use, these buttons will tune up or down through the selected frequency band. A brief (1/2 second) press of the button will manually tune to the next frequency increment, while pressing and holding the button for a longer period will automatically tune to the next station with a signal strong enough for acceptable reception. These buttons will also control Fast Forward and Fast Reverse (or Rewind) for compatible Harman Kardon compact disc players/ changers and cassette tape decks.

**Direct:** Press this button to select a radio station by entering its frequency using the Numeric Keys.

**Numeric Keys:** These buttons serve as a ten-button numeric keypad to enter tuner preset positions.

**Auto Preset:** When the tuner and FM band have been selected, this button may be used to automatically program the tuner presets for all active stations. To start the auto preset scan, press and hold the button. Note that the MEMO and PRESET indicators will flash. After a few seconds, the tuner will start to "look" for active stations, as shown by increasing frequency numbers in the Information Display. Release the button and note that the tuner will briefly stop at each active station and add a preset number to the memory. If the FM tuner found less than the 30 FM stations with acceptable signal strength, the Auto Preset tuning will scan two more cycles or until the remaining vacant preset memory spaces have been filled with those found in the first scan. The scan will stop when all 30 preset memory spaces have been filled or when three scans through the band have been completed.

**Secondary Control Cover:** This sliding cover normally is in the "up" position so that it hides the secondary controls. To access these controls, place your thumb on the small recessed area at the top center of the control, and gently press the cover down and towards you.

**Clear Button:** This button is used to clear preset memory information for the HK3270/ HK3270RDS's tuner.

**Memory:** Press this button to open a memory position that stores a preset location for the HK3270/ HK3270RDS's tuner.

#### 4. TIMING CHART (IF COUNT)

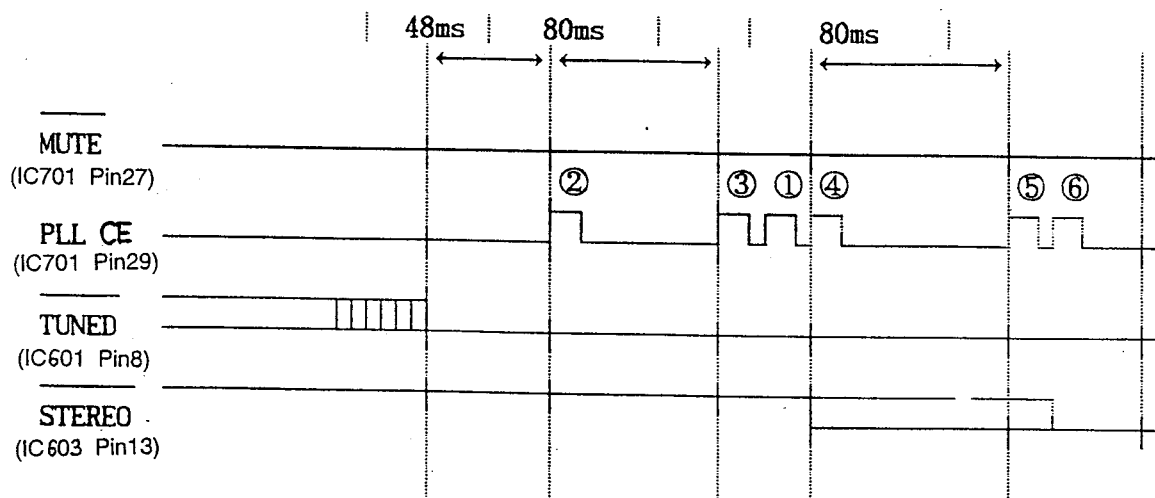

- ① PLL MODE-1
- ② PLL MODE-2
- ③ PLL MODE-3
- ④ PLL MODE-4
- ⑤ PLL MODE-5
- ⑥ PLL MODE-6

A dotted line (.....) : In case that IF COUNT is not proper, follow PLL MODE of ④, ⑤, ⑥.

- When changing BAND, selecting the PRESET STATIONS using TEN KEY and selecting the PRESET STATIONS using PRESET CHANNEL UP/DOWN.

When IF COUNT is not proper in case that the frequency is not tuned,

## - MANUAL TUNING UP/DOWN

↓ KEY ON

(EXAMPLE) 87.5MHz → 108.0MHz  
 108.0MHz → 87.5MHz

## - MANUAL TUNING UP/DOWN key OFF

↓ key off

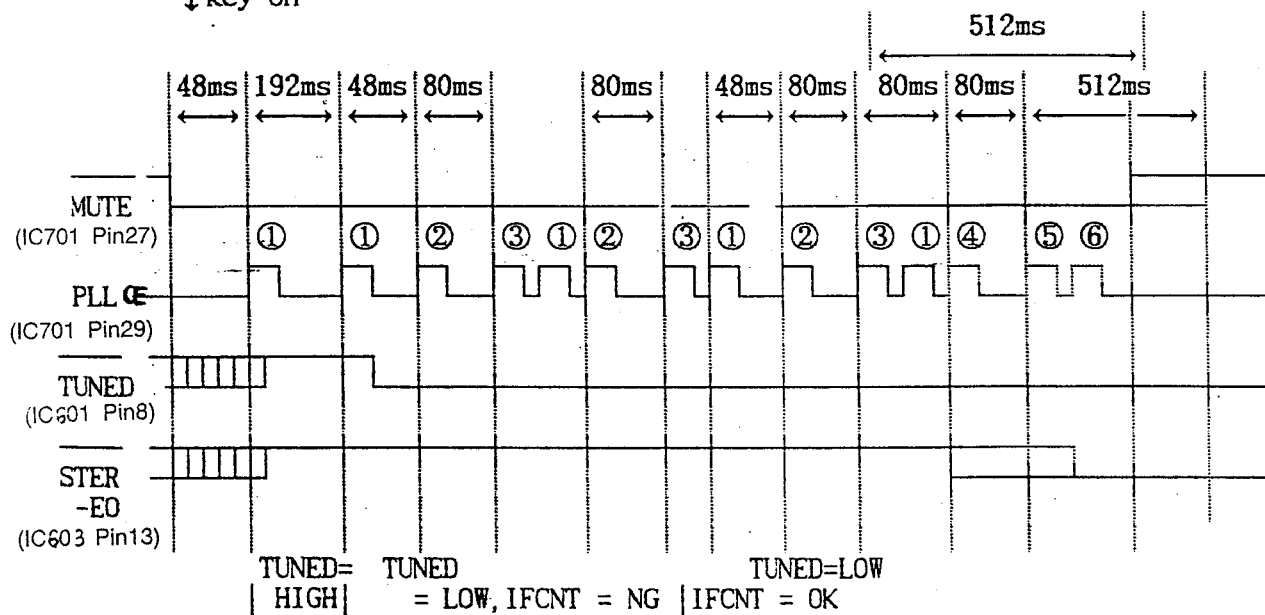

- POWER ON

↓ key on

- AUTO TUNING UP/DOWN

↓ key on

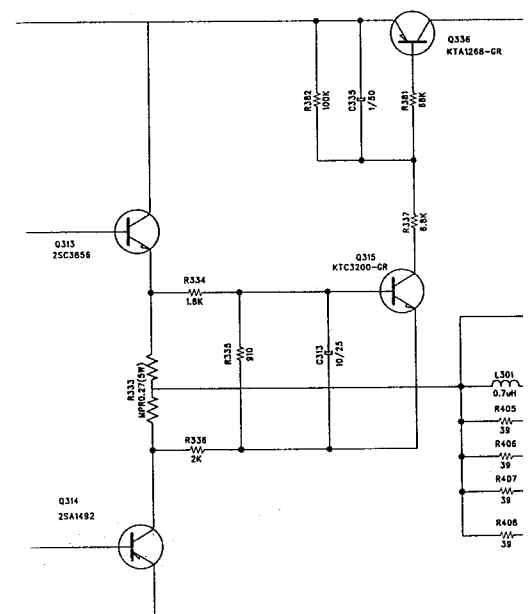

## 5. Protection Circuits

### SPEAKER PROTECTION CIRCUIT

The CPU protects both this unit and the speaker Q313, Q333 and Q314, Q334 due to excess short of the speaker terminals. If current increases turns on Q315, Q335 then Q336 turns on Q337. It brings the protection port of the CPU to low. Then all channels are muted and the display

L-CH

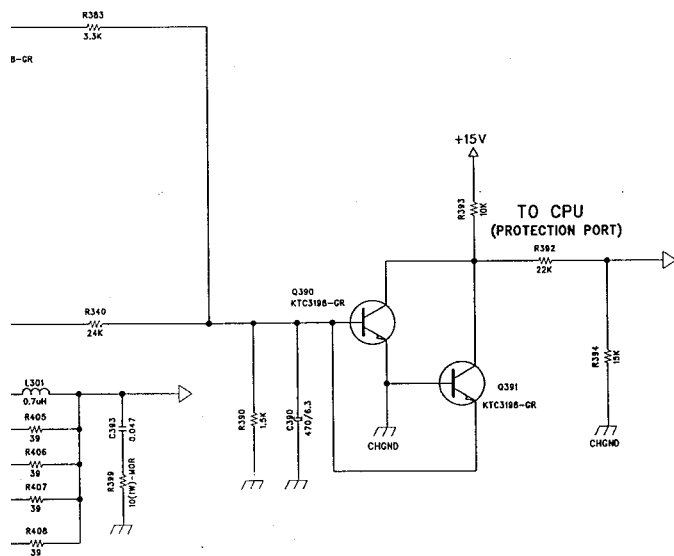

speakers when an abnormally high current flows in excessive input drive, too low of a load impedance, or increase is excessive the voltage across R333, R373, Q390.

low state.

lay is turned off.

This receiver has overload thermal protection circuits to guard abnormal operation. When the temperature of H/SINK POSISTOR rises abnormally, resistance of the posistor becomes larger and Q3 is turned on. It brings the protection port of the CPU to low state. Then all channels are muted and the display is turned off.

This receiver has overload thermal protection circuits to guard abnormal operation. When the temperature of H/SINK POSISTOR rises abnormally, resistance of the posistor becomes larger and Q3 is turned on. It brings the protection port of the CPU to low state. Then all channels are muted and the display is turned off.

### THERMAL PROTECTION CIRCUIT

**1 CHASSIS TOP <42> REMOVAL**

Remove 9 screws <A, K> and then remove the Chassis Top <42>.

**2 FRONT PANEL ASS'Y <AA> REMOVAL**

1. Remove the Chassis Top <42>, referring to the previous step 1.
2. Disconnect the connector <CN701, CARD CABLE> from connector <CW 108> on the Main P.C. Board <1>.
3. Disconnect the lead wire <CW701, 7P> from connector <CW105, 7P> on the Main P.C. Board <1>.
4. Disconnect the connector <CW305, 2P> on the standby P. C. Board <B> from connector <CW101, 2P> on the Main P. C. Board <1>.
5. Remove 1 screw <1> of Chassis Panel and then lead wire <CH 701, 1P> on the Speaker P.C. Board <F>.
6. Disconnect the lead wire <CN706, 4P> on the speaker P. C. Board <F> from connector <CW113, 4P> on the Main P.C. Board <1>.
7. Disconnect the lead wire <CN705, 3P> on the speaker P.C. Board <F> from connector <CW301, 3P> on the Amp P.C. Board <1>.
8. Remove 1 screw <1> of Chassis Panel and then lead wire <CH702, 1P> on the Tone P.C. Board <C>.
9. Disconnect the lead wire <CH107, 8P> on the Volume P.C. Board <D> from connector <CW107, 10P> on the Main P.C. Board <1>.
10. Remove 9 screws <H, 1> and then remove the Front Panel Ass'y <AA>.

**3 FRONT P. C. BOARD <E> REMOVAL**

1. Remove the Chassis Top <42>, referring to the previous step 1.
2. Remove the Front Panel Ass'y <AA>, referring to the previous step 2.
3. Disconnect the lead wire <CW704, 5P> from connector <CW202, 5P> on the Volume P. C. Board <D>.
4. Disconnect the connector <CN702, 5P> from lead wire <SW704, 5P> on the Power P. C. Board <H>.
5. Disconnect the lead wire <CW703, 3P> from connector <CN703, 3P> on the Mute P. C. Board <B>.
6. Remove 13 screws <1> and then remove the Front P.C. Board <E>.

**4 VOLUME P.C. BOARD <D> REMOVAL**

1. Remove the Chassis Top <42>, referring the previous step 1.
2. Remove the Front Panel Ass'y <AA>, referring to the previous step 2.
3. Disconnect the connector <CW203, 2P> from lead wire <CH203, 2P> on the Volume LED P.C. Board <A>.
4. Pull out the Volume knob <1>.
5. Disconnect the connector <CW202, 5P> from lead wire <CW704, 5P> on the Front P. C. Board <E>.
6. Disconnect the connector <CW201, 10P> from lead wire <CW705, 8P> on the Tone P. C. Board <C>.
7. Remove 1 hexagon nut <3>, 1 washer <4> and then remove the volume P. C. Board <D>.

**5 STANDBY P.C. BOARD <B> REMOVAL**

1. Remove the Chassis Top <42>, referring to the previous step 1.
2. Remove the Front Panel Ass'y <AA>, referring to the previous step 2.
3. Disconnect the connector <CW305, 2P> from connector <CW101, 2P> on the Main P. C. Board <1>.
4. Remove 2 screws <1> and then remove the Standby P.C. Board <B>.

**6 POWER P. C. BOARD <H> REMOVAL**

1. Remove the Chassis Top <42>, referring to the previous step 1.
2. Remove the Front Panel Ass'y <AA>, referring to the previous step 2.
3. Disconnect the lead wire <SW704, 5P> from connector <CN702, 5P> on the Front P. C. Board <E>.
4. Remove 2 screws <1> and then remove the Power P.C. Board <H>.

**7 SPEAKER P. C. BOARD <⑦> REMOVAL**

1. Remove the Chassis Top<④②>, referring to the previous step 1.
2. Remove the Front Panel Ass'y <AA>, referring to the previous step 2.
3. Remove 3 screws <⑤, ①> and then remove the Speaker P.C. Board <⑦>.

**8 TONE P. C. BOARD <⑧> REMOVAL**

1. Remove the Chassis Top<④②>, referring to the previous step 1.
2. Remove the Front Panel Ass'y <AA>, referring to the previous step 2.
3. Pull out the Balance knobs<⑤>.
4. Disconnect the lead wire <CW705, 8P> from connector <CW201, 10P> on the Volume P.C. Board <④>.
5. Remove 4 screws <①> and then remove the Tone P.C. Board Ass'y<AC>.
6. Remove 4 hexagon nut <③>, and then remove the Shield Balance <⑩>.

**9 VOLUME LED P.C. BOARD<⑨> REMOVAL**

1. Remove the Chassis Top <④②>, referring to the previous step 1.
2. Disconnect the lead wire <CH203, 2P> from connector <CW203, 2P> on the Volume P. C. Board <④>.
3. Pull out the Volume knob Ass'y <AD>.
4. Remove the Volume LED P.C. Board<⑨>.

**10 RADIATOR ASS'Y <AB> REMOVAL**

1. Remove the Chassis Top<④②>, referring to the previous step 1.
2. Disconnect the lead wire <CH110, 4P> from connector <CW110, 4P> on the Main P. C. Board<①>.
3. Disconnect the lead wire <CH112, 5P> from connector <CW112, 5P> on the Main P. C. Board<①>.
4. Remove 1 screw <①> of the Radiator<⑨> and then disconnect the connector <CW 302, 2P>.
5. Disconnect the lead wire <CH111, 8P> from connector <CW111, 8P> on the Main P. C. Board<①>.
6. Disconnect the connector <CW301, 3P> from lead wire <CN705, 3P> on the Speaker P. C. Board<⑦>.
7. Remove 4 screws <①, ①> and then remove the Radiator Ass'y <AB>.

**11 AMP P.C. BOARD <①> REMOVAL**

1. Remove the Chassis Top<④②>, referring to the previous step 1.
2. Remove the Radiator Ass'y <AB>, referring to the previous step 10.
3. Remove 4 screws <①> and then remove the Amp P.C. Board<①>.

**12 TUNER P.C. BOARD <⑫> REMOVAL**

1. Remove the Chassis Top<④②>, referring to the previous step 1.
2. Remove 2 screws <③, ⑧> and then remove the Tuner P.C. Board<⑫>.

**13 MAIN P. C. BOARD <①> REMOVAL**

1. Remove the Chassis Top<④②>, referring to the previous step 1.
2. Remove the Tuner P. C. Board<⑫>, referring to the previous step 12.
3. Disconnect the connector <CW105, 7P> from lead wire <CW701, 7P> on the Front P.C. Board <⑥>.
4. Disconnect the connector <CW114, 3P> from lead wire <3P, Orange 2P, Gray 1P> in the P/T<③⑥>.
5. Disconnect the connector <CW111, 8P> from lead wire <CH111, 8P> on the Amp P. C. Board<①>.
6. Disconnect the connector <CW104, 3P> from lead wire <3P, Blue 2P, Black 1P> in the P/T<③⑥>.
7. Disconnect the connector <CW110, 4P> from lead wire <CH110, 4P> on the Amp P. C. Board<①>.
8. Disconnect the connector <CW107, 10P> from lead wire <CH107, 8P> on the Volume P. C. Board<④>.
9. Disconnect the connector <CW112, 5P> from lead wire <CH112, 5P> on the Amp P. C. Board<①>.
10. Disconnect the connector <CW108, Card Cable> from connector <CN701> on the Front P.C. Board <⑥>.

10. Disconnect the connector <CW108, Card Cable> from connector <CN701> on the Front P.C. Board <②>.
11. Disconnect the connector <CW103, 2P> from lead wire <2P, Yellow & White> in the P/T <③⑤>. (HK3270RDS only)
11. Disconnect the connector <CW103, 2P> from lead wire <2P, Black & White> in the P/T <③⑥>. (HK3270 only)
12. Disconnect the connector <CW102, 2P> from AC Cord Ass'y <AE>.
13. Disconnect the connector <CW101, 2P> from connector <CW305, 2P> on the Standby P. C. Board <②>.
14. Disconnect the connector <CW106, 3P> from connector <CH401, 3P> on the Sub P/T P. C. Board <①>. (HK3270RDS only)
15. Disconnect the connector <CW106, 3P> from lead wire <3P> in the P/T <③⑤>. (HK3270 only)
16. Disconnect the connector <CW113, 4P> from lead wire <CN706, 4P> on the Speaker P.C. Board <①>.
17. Remove 21 screws <Ⓚ, ④> and then remove the Chassis back <③⑦>.
18. Remove 6 screws <③, ⑤> and then remove the Main P. C. Board <①>.

brings

#### ⑭ SUB P/T P. C. BOARD <①> REMOVAL (HK3270RDS only)

1. Remove the Chassis Top <④②>, referring to the previous step ①.
2. Disconnect the connector <CW401, 3P> from lead wire <3P> in the P/T <③⑥>.
3. Disconnect the lead wire <CH401, 3P> from connector <CW106, 3P> on the Main P. C. Board <①>.
4. Remove 4 screws <Ⓚ> and then remove the Sub P/T P. C. Board <①>.

#### ⑮ POWER TRANS <③⑥> REMOVAL

1. Remove the Chassis Top <④②>, referring to the previous step ①.
2. Disconnect the lead wire <3P, Orange 2P, Gray 1P> from connector <CW114, 3P> on the Main P. C. Board <①>.
3. Disconnect the lead wire <3P, Blue 2P, Black 1P> from connector <CW104, 3P> on the Main P. C. Board <①>.
4. Disconnect the lead wire <2P, Yellow & White> from connector <CW103, 2P> on the Main P. C. Board <①>.
5. Disconnect the lead wire <3P> from connector <CW401, 3P> on the Sub P/T P. C. Board <①>. (HK3270RDS only)
6. Disconnect the lead wire <3P> from connector <CW106, 3P> on the Main P. C. Board <①>. (HK3270 only)
7. Remove 4 screws <③> and then remove the Power Trans <③⑥>.

## ELECTRICAL PARTS LIST

PRODUCT SAFETY NOTICE : Products marked with ▲ Have special characteristics important to safety.  
 If you replace any of these components, read carefully the product safety notice in  
 Don't degrade the safety of the product through improper servicing.  
 Resistor/capacitor tolerance-- D: ( $\pm 0.5\%$ ), J: ( $\pm 5\%$ ), K: ( $\pm 10\%$ ), M: ( $\pm 20\%$ ).

Diagram illustrating the packing process for the HK3270. The device is shown with numbered callouts (1, 2, 3, 4) indicating the placement of packing material. The device is placed into a box, and the box is sealed with tape (5). The final step shows the box being wrapped in a protective material (6).
