

A photograph of a yellow cylindrical capacitor mounted on a brown printed circuit board (PCB). The capacitor has the text "BENNIC" and "4.7J250V" printed on its side. Above the capacitor, a thick copper wire is looped into a vertical coil. The PCB has several other components and solder joints visible, including a small black component to the left of the capacitor and a white component further back. The background is a light-colored, textured surface.
