JUNO
COMPOSITES

Innovation

Our team have a strong track record in development of innovative products and manufacturing technologies within the composite materials industry in particular our range of proprietary DECO composites and thermoformable advanced composite preconsolidated laminates.

Quality and performance guaranteed

At Juno Composites we understand that mechanical, physical and thermal property prediction is vital to the uptake of new and unfamiliar materials and manufacturing technologies into any industry. Basic requirements for all new materials are that they can be modelled and their performance predicted effectively. That's why we guarantee performance having tested all our structural composite products in conformance with EN, BS, ISO, and ASTM standards.

Large range of products available online

We have a huge range of high performance carbon fibre sheet, plate and sandwich panels available from stock with worldwide shipping and sold through our online outlet www.carbonfibreshop.com.

Innovative new products

DECO is an innovative product range that combines the high performance characteristics of advanced composites with ultra high definition graphics that can mimic the look of real wood, marble, signage illustrations and text/logos. Available as sheets and sandwich panels, the DECO range has numerous applications from lightweight luxury marine builds, modular hospitality suites to interpretation signs.

THERMOFORM advanced composite sheets can be formed into shaped parts with the application of heat and pressure. Our formable composite sheets can consist of carbon, glass or aramid reinforcements. These products can be over-moulded, joined together with fusion welding techniques and are more readily recyclable.

Sandwich core panels consist of two 0.5mm carbon fibre skins that 'sandwich' an ultra low density (80kg/m³) closed cell IPN core. The surface finish of both skins is smooth and glossy as standard although a matte bonding surface can be specified if desired.

Product Information
The website details the specifications of all our products that can be ordered online and delivered worldwide.

Customised products
Simply enter your own dimensions for any sheet, plate or panel product and buy online instantly.

Technical performance datasheets
Technical datasheets detailing mechanical, physical and temperature properties of all our products.

Technical Support
Our website has a variety of resources and how to guides that offer expert tips on how to use our products.

STANDARD carbon fibre sheet is manufactured using multiple layers of genuine 100% carbon fibre infused with epoxy resin creating a high stiffness, high strength, light weight and aesthetically pleasing material. All STANDARD carbon fibre sheets have a glass transition temperature of 90°C with higher temperature performance available upon request. Other sizes and thicknesses available upon request.

	1.0mm	2.0mm	3.0mm	5.0mm
1220x200mm	€65.00	€115.00	€139.99	€205.00
1220x600mm	€195.00	€340.00	€440.00	€550.00
1220x1220mm	€345.00	€675.00	€765.99	€899.99
1220x2440mm	€765.99	€1370.00	€1529.99	€1999.99
Prices in Euro ExVAT				

ECONOMY carbon fibre sheet is manufactured using multiple layers of genuine 100% 12k 2x2 carbon fibre twill reinforcements infused with epoxy resin creating a high stiffness, high strength, light weight and aesthetically pleasing material. All ECONOMY carbon fibre sheets have a glass transition temperature of 90°C with higher temperature performance available upon request. Other thicknesses and sizes available upon request.

	1.2mm	2.0mm	3.0mm
1220x200mm	€59.99	€75.00	€96.50
1220x600mm	€180.00	€255.00	€299.99
1220x1220mm	€243.99	€415.99	€599.99

Prices in Euro exVat			

Our carbon fibre **PLATE** range is manufactured with 100% carbon fibre and epoxy resin for ultimate high strength and modulus and available from 4mm to 30mm thick. Custom thickness, reinforcement type and layup specification are available upon request. Typical applications include: mechanical components, bearing retainers, gears, bushings etc.

FLEXIBLE Ultra-thin smooth glossy carbon fibre sheet is manufactured using 100% genuine carbon fibre infused with epoxy resin and backed with a pressure sensitive 3M adhesive. Features a flawless finish guaranteed for unrivalled aesthetics

	0.25mm with 3M Adhesive	0.5mm
1220x200mm	€49.99	€65.99
1220x600mm	€180.00	€210.82

1220x2440mm	€499.95	€550.00
Prices in Euro exVAT		

SANDWICH core panels consist of two thin advanced composite skins that 'sandwich' an ultra low density core such as foam or honeycomb. The surface finish of both skins is smooth and glossy as standard although a matte bonding surface can be specified if desired. Customised sandwich panel constructions are possible e.g. core type/density, skin materials, thickness and temperature performance.

CF/IPN	6mm	11mm	21mm
