

TOP QUALITY DOUBLE C CORE AUDIO TRANSFORMERS!

KORATO

☛ We make a wide range of *DCC transformers* for tube amplifiers in cooperation with Trafomatic company.

☛ Our production range includes *Single ended, Push Pull, Push Pull Ultra Linear, Mains transformers and C core* chokes for all kinds of audio applications.

☛ We do not have a standard pricelist as all of the transformers are wound specifically for each customer and his demands (at no extra cost), so please e-mail us with the parameters that you need for your transformer.

NO JOB TOO SMALL, NO JOB TOO BIG.

☛ Power range from *5W to 300W*. The laminations on transformers are 0.22 mm or 0.27mm, High B. The wire we use is the famous cooper wire from Italy. You will be amazed at quality and prices! We also make a wide range of mains toroid transformers at incredible low prices especially if you order larger quantities. Power range from 10VA to 10KVA. OEM manufacturers and individual buyers are welcome.
