

C9 and C20 : Try values between 10nF and 1uF (max 1uF)  
 Greater value = more startup time, best transient, low noise

Noise : 40-80uV RMS  
 Load regulation : > 1 mV  
 Dropout : 150mV

2 x 3x4 mm tube bead per filter

15v PSU using LT3080		
for personnal use
