

M-60 Signal-Path Schematic (v1.0)

(for non-commercial DIY use, courtesy of Atma-Sphere Music Systems, all intellectual property rights reserved)

18-March-2010; DIYaudio member, "Mullard EL34"

- Changes from original M-60 signal-path schematic:
- * input-stage bias-current increased from 2.5mA to 5mA
- * input-stage plate resistors decreased to 50K-ohms
- * 6AS7 cathode resistors increased to 5-ohms
- * SW4 implements NFB on/off functionality
