The head store is the earphone everybody world: Authenticates the business, the profession member

Solid racket picture
Front panel
POWER: Power switch IR: Remote control mouth HDD: Hard disk lamp
USB HOST: External connection USB equipment mouth USB DEVICE:USB line connection

Back board
OPTICAL: The optical fiber outputs
COAXIAL: Coaxial outputs
L R OUT: Analog output
Right flank is the power line plug

Left side surface: SD card slot

Internal structure: This aircraft sign matches does not contain the hard disk, in the picture hard disk only
makes the installment hint to use

DAC board: CS4398 decoding chip, superelevation precision 1ppm TCXO crystal oscillator

The sign matches the wire rod

Product synopsis:
1: Supports WAVE, APE, FLAC, AAC, MP3, M4A, WMA, WMV, form and so on Ogg Vorbis music documents.
2: Uses Windows the Mobile 6 operating systems, to use 3.5 inch real color touchscreens, the operation, the selected song great convenience, may install the application software voluntarily.
3: The support external connection U plate, moves the hard disk, supports the built-in SATA connection 2.5 inches hard disks (, if uses 3.5 inches hard disks to do voluntarily decides power unit).
4: Uses superelevation precision 1ppm the TCXO crystal oscillator.
5:DAC based on the CS4398 design, supports 24bit/96KHZ high.
6: Uses fine materials, the power unit for active raises the clothing constant voltage + Class A parallel constant voltage.
7: Supports the SPDIF output, the optical fiber, the coaxial two ways.
8: Based on the HIFI idea design, the divariant depressor, the digital circuit and DAC each independence uses a high efficiency transformer.
9:DAC with reaches permanently specially makes the E cow, the transformer shields completely, will not have the disturbance to DAC.
10: The complete machine non-DC-DC power source, is the linear power source completely.
11: The sign matches infrared remote control one.
12: Support remote control close-down (thorough power failure).
13: The engine case uses 1.2mm sheet iron Canada for the specialized sound to rub the sand blasting to model the craft, upscale natural, anti-electromagnetic interference; the 7mm thick aluminum wiredrawing oxidation kneading board, has the black and the aluminum alloy primary color (silver-white color) two kind of specifications.
14: Engine case size: 280mm(W)×95mm(H)×320(L), packing latter 5 kilograms.

Compares place of the old version improvement:
1: The original design uses LM7805, adds radiator fin's way to supply power to the hard disk. Has two problems: Supplies power the insufficiency, because some hard disk initial firing current is big, 7805 cannot lead; The radiator fin is very very hot. The update power source changes LM1084 (5A), and radiates using the kneading board, the effect is extremely good.
2: The original design USB signal with the signal relay cut, regarding the USB2.0 signal, will have the unstable phenomenon. The update trades for the special-purpose USB switch chip, stable reliable.
3: The update added on USB to transfer the SATA electric circuit, supported the SATA connection 2.5 inches hard disks directly.
the 4:SD card trough places the side, gave dual attention inserted pulls out the card the convenience and kneading board's artistic.
the 5:DAC power source did modified greatly, no longer used 78 series simple constant voltage power supplies, but has used the active servo and the Class A parallel power source, was self-evident to the sound improvement.
6:DAC added the first-level cushion, the sound field has been more accurate.
the 7:DAC static sound electric circuit (special-purpose tube) has substituted the relay with the traditional triode.
the 8:DAC cow changes to reaches the cow permanently.
9:DAC PCB walks line overstrikeing (at least 50%), the copper anchors thickness to thicken 1 time (2OZ,70um), enhanced the sound density.

the 10:DAC resistance traded is completely the DALE resistance, the electric capacity has also gotten up at least a stair, the essential spot used nichicon the top KZ series electric capacity (Japan to produce originally, not made in China).

11:DAC the LPF partial parameters made the adjustment, the sound have borne listen.

12: The engine case no longer uses "the tectonic plate" the structure, is more artistic.

Subtotal: Main modification in DAC, does not count the cost, is only the good sound.

System upgrade:

1: Promotion software downloading address: http://www.mayaaudio.com/download.asp, the factory will brush machine the document in this renewal, will provide the following promotion service, will ask respectfully the attention.

2: Brushes machine and the establishment method

(1) looks opens the ordinary SD card (attention not to be able to be SDHC), table of contents constructs a name in SD under the Kaghan to call update the folder.

(2) beats FLASH.bin under the update table of contents.

(3) supposes the SD card the protected mode, inserts to within the aircraft in the SD card trough.

(4) restarts the machine, carries on the promotion automatically, entire process approximately 3 minutes.

(5) liter level enters the system automatically, draws out the card, deletes the update folder.

(6) presses the prompt establishment system, the touchscreen calibrates, the date revision, other options is again complete "the jump".

(7) installs pocket music5.3.5, or pocket player4.1, along with likes personally.

(8) enters the establishment - today - project - "the date", "pocketmusic " the item hits cancels, other all do not hit cancel.

(9) enters starts - resources supervisor - my equipment - Program under the Files-PocketMusic folder, long presses PocketMusic.exe, the choice "the duplication". Enters again to windows-Startup the folder, presses in blank department head, choice "glue quick way", withdrawal then. Next time starting then automatically enters the player.

(10) opens pocketmusic, selects left bottom in turn "the function table" - "the mapping option" - "the operation broadcast/suspension" - "the operation", will press remote control's broadcast suspension key again, on the contact surface will demonstrate that code value F15, the spot "will complete" the withdrawal then. Good, until now established finishes, the remote control might also use.

Frequently asked questions:

1: Questioning: Engine case size how many?

  Answer: Extends 28cm, high 9.5cm. long 32CM.

2: Questioning: The player has English contact surface?

  Answer: Has UK, Jan, the numerous three kinds to be possible to elect, when installment broadcast software chooses the language which needs to be possible.

3: Questioning: May support the big hard disk most greatly?

  Answer: Has tried 500G, may use, bigger has not tried, had not known that the capacity limit is big.

4: Questioning: Supports the NTFS form?

  Answer: Does not support, this is the MS WM6 system does not support, does not have the means solution. The hard disk can only the form change into the FAT32 district, but has a temperature the friend to change into with DM the 500G hard disk form 1 district, can use normally.

5: Questioning: How renewal within the aircraft hard disk's music document?

  Answer: May with the USB line connection this aircraft (on kneading board that square USB mouth), within the aircraft the hardware quite in move the hard disk directly, the direct renewal might, beat 30G the document not to surpass 20 minutes. Certainly uses the SD card to beat the document to the hard disk is also may.

6: Questioning: Supports WIFI?

   Answer: Does not support temporarily, may make SIDO the connection the WIFI module, inserts to the SD card trough in then, may also purchase the SDWIFI wireless network card product voluntarily.

7: Questioning: How to realize the remote control close-down?

   Answer: Under the starting condition will press down on kneading board's power switch, on the screen will spring "Shut Down The System Now?"Choice otherwise then. Needs to close down when will press down remote control's close-down key, the system will close down automatically, (but because cannot the remote control starting already thorough power failure).

8: Questioning: pocket the music volume did not remember, each time starting only then half volume?

   Answer: The volume did not remember the question also has the solution, establishment removes in pocket inside the music and the system volume synchronization option's hook, the system audio control most greatly might again.

9: Questioning: How does the remote control establish?

   Answer: Concrete step ①, according to right bottom menu;②, the pressed key 映 shoots the option;③, according to tap here to and new mapping;④, according to does not have completely; ⑤, the remote control treats is meeting stops according to, will present the digit;⑥, presses the right bottom again completion, on OK.

10: Questioning: How does one starting enter the PocketMusic broadcast contact surface

   Answer: Enters starts - resources supervisor - my equipment - Program under the Files-PocketMusic folder, long presses PocketMusic.exe, the choice "the duplication". Enters again to windows-Startup the folder, presses in blank department head, choice "glue quick way", withdrawal then. Next time starting then automatically enters the player.

11: Questioning: How is the formatted large capacity hard disk the FAT32 form?

   Answer:

(1) changes into the hard disk form NTFS, not capacity limit.

(2) moves Iomega FAT32 the Formatter.EXE,2 second to complete the transformation;

(3) turns on your hard disk, the right key "the attribute", had a look at already the transformation was FAT32. (Iomega FAT32 Formatter.EXE may arrive at on-line downloading: Large capacity hard disk NTFS transfers the FAT32 procedure)

12: Questioning: Certain APE form document presents the broadcast card the phenomenon, how to solve?

   Answer: The recommendation uses FOOBAR2000, opens APE or the CUE document, in is broadcasting in the table of contents the right key choice transforms, the transformation form chooses APE - Monkey's Audio (Normal), after the transformation, then broadcasts.

The player sign will match the broadcast software synopsis (different versions contact surface to have slight difference)

Stated: In the article mentioned the software copyright turns over to the original author all, please support purchases the legal copy. The software is on-line collection or exchanges study in private, any involves the commercial profit goal not to use, otherwise produces all consequences will undertake by you!

Music player PocketMusic Player Bundle v5.3.5 synopsis

Compatible platform: WM2003-6.5, QVGA, VGA, WQVGA, WVGA
Program name: PocketMusic Player
Procedure edition: v5.3.5
Procedure type: Music broadcast

PS: Installs chooses " English finally " the language, is simplified Chinese, and already conformity by Dasaixx AAC plug-in unit
Tests the platform: D838 WM6.5.3

Software synopsis:
On PPC the acoustic fidelity best music player, may in today demonstration player. The software brings the EQ balanced regulator, the alarm clock timer, the bass boost and so on, the function to be formidable. Supports VGA perfectly, QVGA, WQVGA and WVGA
It has the traditional contact surface, 10 wave band balancers, the function formidable broadcast tabulation edition and so on, expands the package through the function also to be possible to support Winamp completely Skin; Supports the known all MP3 code, lets you no longer feel the headache for the decoding way, supports WAV/APE/FLAC/MP3/OGG/WMA and so on many kinds of forms. At the same time, does not need the document copy to My under the documents folder, it to be able again to broadcast stores up under any folder's document.

Renewal content:
v.5.3.5 renewal:
- increase general pressed key mapping mode
- increase special edition art title page *.jpeg form picture expansion
- when the repair through writes down the file command increase song, according to filename/song serial number classification broadcast tabulation question
- when the song changes, PocketMusic might preserve the current broadcast now to tabulate the position, after having avoided the close-down, from previous time will not broadcast the question which the position continued to broadcast, possibly as well as caused unusual program termination.

Other explained:
Why said that it is the acoustic fidelity best player?
Because she has the outstanding decoder, and supports Gapless playback (broadcast) and supports Monkey's Audio form (APE)! (therefore Gapless the playback translation is only the Gapless broadcast, maintains primary taste). Everybody might under the attempt her acoustic fidelity, be much better compared to the similar player acoustic fidelity!
Explained about Gapless playback and Monkey's Audio:
Regarding has the request musical public, whether supports gapless playback is the determination outstanding player important standard. So-called gapless playback is refers to between the sound axle and the sound axle does not have the gap, this to listens to the classical music, the opera and the location recording is specially important. For instance the Beethoven fifth symphony 3rd and between the 4th music movement is should be ceaseless.
Monkey's the Audio form's music document, he does not look like general MP3 or the OGG music form, to save the space to lose the proper music quality. What Monkey's Audio emphasis holds the original high quality acoustic fidelity, and compresses is quite fast, supports the ID3 edition.
