

# Ono\_spaz Guitar Preamp

(a few suggestions)

Higher value for R4 = more gain.  
depending on JFET IDSS and Vgs-off.

Must have CX1 to maintain proper bias on Q1.  
If desired, CX2 will give you more gain.  
Must have CX3 to maintain proper DC bias on Q2.

```
AC 1  
.tran .4  
Rser=1  
:ac dec 300 1 1000k
```
