

10 July 2020

C1 IS A NON-POLAR ELECTROLYTIC CAPACITOR (NICHICON "UES" WITH GREEN SLEEVE IS PREFERRED)

THE PCB HAS TWO DIP-8 SOCKETS. IT WILL ACCEPT *EITHER* A SINGLE OPAMP LIKE LT1122, *OR* A DUAL OPAMP (2 AMPS/PKG) LIKE OPA2134. THIS ALLOWS BUILDERS TO LISTEN TO ALL OF THEIR FAVORITE OPAMP CHIPS, BOTH SINGLES AND DUALS.
