

# Piezo Ceramic Speakers

## Model KSN 1025B Wide Dispersion Horn Tweeter

The 2 x 6 inch exponential horn has full 90° included angle horizontal dispersion. With an impedance of over 400 ohms at 1 kHz, and still above 20 ohms at 40 kHz, the piezo ceramic speaker presents no added load to the amplifier and rejects low frequency power without requiring a crossover network. Electrically, these piezo ceramic speakers appear as 0.3 mfd capacitors and exhibit high efficiency (40 - 50%) in converting electrical energy into acoustical energy.
