

# Quasar SMPS rev.2.0

## Solid State & Tube SMPS

www.vicol-audio.ro

jumpers to select 110v or 220v

### Quasar SMPS rev.2 setup:

- in case of solid state use: "A" board provides Vout = +/- 50v at 12-15A; "B" & "C" boards provide optional selectable Vaux = +/- 6v/9v/15v at 1A;
- in case of tube use: "A" board provides Vout = +300v for anodic; to obtain Vout, C38-C43 it must be replaced with 2 proper electrolytics (for ex., 1200uF/200v), as shown; use "B" board and connect the two jumpers to obtain (2 independent) Vaux = 6,3v at 10A-12A for filaments.
