

THE ETERNAL PARADOX OF MOTION

$$\begin{array}{c} C = 0 \cap (\infty \pm x) \\ \Sigma \\ \infty \cup (0 \pm y) \end{array}$$

(THE SIMPLICITY OF THIS EQUATION NEARLY BELIES ITS IMPLICATIONS)

C = the moment of creation , but also

C = the moment of conception.

C also = **B** - being the Big-Bang.

C and **B** = endless perpetual motion –

AKA. Eternal Motion.
