Order Code: DAEX32EP-4

Availability: **In Stock** 

Dayton Audio's DAEX32EP-4 Thruster exciter is built to turn large, thick, rigid surfaces into speakers. The 32 mm voice coil is attached to a steel spider for maximum restoring force when large amounts of power are applied, making it perfect for large glass panes, furniture, and surfaces that would normally resist the effects of an exciter.

Turn even large, rigid surfaces into speakers with the Dayton Audio DAEX32EP-4 Thruster exciter!

Dayton Audio's DAEX32EP-4 Thruster exciter is built to turn large, thick, rigid surfaces into speakers. The 32 mm voice coil is attached to a steel spider for maximum restoring force when large amounts of power are applied, making it perfect for large glass panes, furniture, and surfaces that would normally
