

# PHILIPS

500Hz

5,000Hz

## 500-5,000Hz and it's almost flat. How's that for about \$50 worth!

It's the performance curve of Philips new mid range speakers. That curve is so flat it gives a variation of as little as  $\pm 1$  dB over the same frequency spread. And even beyond those levels the drop is gradual on either side. And to think

**JUST \$50**  
— give or take  
some small change.

this performance is now available for about the \$50 mark. Not bad for a 50 Watt dome squawker speaker. For further information please contact
