

Sim for PHL 1752 Nd. 2.1 litre sealed box with 200 watts AES.

Max continuous SPL at 200Hz = 112dB, 300Hz = 115dB, 400Hz = 115dB. Max peak SPL 's are approx 3dB higher. Q = 0.5 for optimum / critical damping.

Notes – Red line = max power before thermal limit. Green line = Xmax limit. Min recommended crossover frequency = 150Hz.
