SPECIFICATIONS

AUDIO POWER SPECIFICATIONS (US MODEL)

POWER OUTPUT AND TOTAL HARMONIC DISTORTION
200 watts minimum continuous average power into 4 ohms,
20 Hz to 300 Hz with no more than 0.2% total harmonic
distortion per Car Audio Ad Hoc Committee standards.

Other Specifications

Circuit system	Class D Technology	Low-pass filter	50 – 300 Hz, -12 dB/oct
	Pulse power supply	Low boost	0 – 10 dB (40 Hz)
Inputs	RCA pin jacks	Power requirements	12 V DC car battery (negative ground)
	High level input connector	Power supply voltage	10.5 – 16 V
Outputs	Speaker terminals	Current drain	at rated output : 62 A (at 2 Ω)
	Through out pin jacks	Dimensions	Remote input : 2 mA
Suitable speaker impedance	2 – 8 Ω		Approx. 295 × 57 × 290 mm (11 5/8 × 2 1/4 × 11 1/2 in.) (w/h/d) not incl. projecting parts and controls
Maximum outputs	400 W (at 4 Ω) 800 W (at 2 Ω)	Mass	Approx. 2.8 kg (6 lb. 3 oz.) not incl. accessories
Rated outputs (supply voltage at 14.4 V)	200 W (20 Hz – 300 Hz, 0.2% THD, at 4 Ω) 400 W (20 Hz – 300 Hz, 0.6% THD, at 2 Ω)	Supplied accessories	Mounting screws (5) High level input cord (1) Protection cap (1)
Frequency response	5 Hz – 300 Hz (+0.5 dB)	Design and specifications are subject to change without notice.	
Harmonic distortion	0.06% or less (at 100 Hz, 4 Ω)		
Input level adjustment range	0.3 – 6.0 V (RCA pin jacks) 1.2 – 12.0 V (High level input)		

Notes on Chip Component Replacement

- Never reuse a disconnected chip component.
- Notice that the minus side of a tantalum capacitor may be damaged by heat.

5. ELECTRICAL PARTS LIST 17

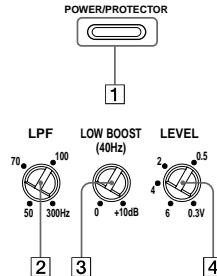

SECTION 1

GENERAL

This section is extracted from instruction manual.

Location and Function of Controls

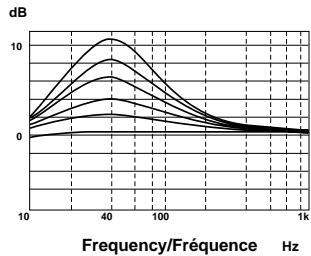

- ① POWER/PROTECTOR indicator**
Lights up in green during operation.
When the PROTECTOR is activated the indicator will change from green to red.
When the PROTECTOR is activated refer to the TroubleShooting Guide.
- ② Cut-off frequency adjustment control**
Sets the cut-off frequency (50 – 300 Hz) for the low-pass filters.
- ③ LOW BOOST level control**
Turn this control to boost the frequencies around 40 Hz to a maximum of 10 dB.
- ④ LEVEL adjustment control**
The input level can be adjusted with this control. Turn it in the clockwise direction when the output level of the car audio unit seems low.

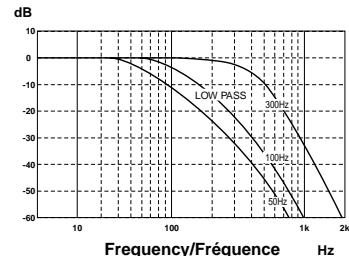

Emplacement et fonction des commandes

- ① Indicateur POWER/PROTECTOR**
S'allume en vert en cours de fonctionnement.
Lorsque PROTECTOR est activé, le voyant passe du vert au rouge.
Lorsque PROTECTOR est activé, reportez-vous au guide de dépannage.
- ② Commandes de réglage de la fréquence de coupure**
Règle la fréquence de coupure (50 – 300 Hz) pour les filtres passe-bas.
- ③ Commande de niveau LOW BOOST**
Tournez cette commande pour amplifier les fréquences autour de 40 Hz à un maximum de 10 dB.
- ④ Commande de réglage LEVEL**
Le niveau d'entrée peut se régler avec cette commande. Tournez cette commande dans le sens des aiguilles d'une montre lorsque le niveau de sortie de l'autoradio semble faible.

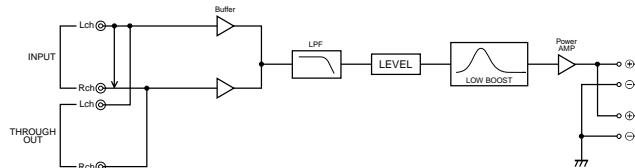

Low boost/ Amplification de basses fréquences

Low Pass Filter/ Filtre passe-bas

Circuit Diagram/ Schéma du circuit

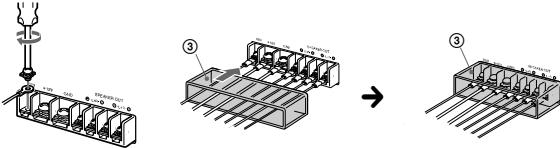

Connections

Caution

- Before making any connections, disconnect the ground terminal of the car battery to avoid short circuits.
- Be sure to use speakers with an adequate power rating. If you use small capacity speakers, they may be damaged.
- Do not connect the \ominus terminal of the speaker system to the car chassis, and do not connect the \ominus terminal of the right speaker with that of the left speaker.
- Install the input and output cords away from the power supply wire as running them close together can generate some interference noise.
- This unit is a high powered amplifier. Therefore, it may not perform to its full potential if used with the speaker cords supplied with the car.
- If your car is equipped with a computer system for navigation or some other purpose, do not remove the ground wire from the car battery. If you disconnect the wire, the computer memory may be erased. To avoid short circuits when making connections, disconnect the +12 V power supply wire until all the other wires have been connected.

Make the terminal connections as illustrated below.
Effectuez les connexions des bornes comme illustré ci-dessous.

Pass the wires through the cap, connect the wires, then cover the terminals with the cap.

Note

When you tighten the screw, be careful not to apply too much torque * as doing so may damage the screw.

* The torque value should be less than 1 N·m.

Connexions

Attention

- Avant d'effectuer les connexions, débranchez la borne de masse de la batterie de voiture pour éviter tout court-circuit.
- Veillez à utiliser des haut-parleurs de puissance adéquate. Si vous utilisez des haut-parleurs de faible capacité, ils risquent d'être endommagés.
- Ne raccordez pas la borne \ominus du système de haut-parleurs à la carrosserie de la voiture ni la borne \ominus du haut-parleur droit avec celle du haut-parleur gauche.
- Eloignez les câbles d'entrée et de sortie du câble d'alimentation pour éviter les interférences.
- Cet appareil est un amplificateur de haute puissance. Il ne peut donc déployer sa pleine puissance que si les câbles de haut-parleurs de la voiture lui sont raccordés.
- Si votre voiture est équipée d'un système de navigation ou d'un ordinateur de bord, ne retirez pas le câble de terre de la batterie de la voiture, sinon les données mémorisées seront effacées. Pour éviter un court-circuit lorsque vous effectuez les branchements, branchez le câble d'alimentation +12 V après avoir branché tous les autres câbles.

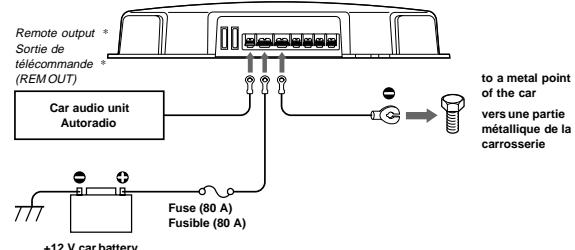

Faites passer les câbles par le cache, raccordez les câbles, puis recouvrez les bornes avec le cache.

Remarque

Lorsque vous vissez la vis, faites attention à ne pas appliquer une trop grande force *, car cela pourrait endommager la vis.

* Le couple de torsion doit être inférieur à 1 N·m.

Power Connection Wires Câbles d'alimentation

- * If you have the factory original or some other car audio unit without a remote output on the amplifier, connect the remote input terminal (REMOTE) to the accessory power supply.
- * Si vous disposez du modèle d'origine ou d'un autre autoradio dont l'amplificateur ne comporte pas de sortie de télécommande, raccordez la borne d'entrée de télécommande (REMOTE) à la prise d'alimentation accessoires.

Notes on the power supply

- Connect the +12 V power supply wire only after all the other wires have been connected.
- Be sure to connect the ground wire of the unit securely to a metal point of the car. A loose connection may cause a malfunction of the amplifier.**
- Be sure to connect the remote control wire of the car audio unit to the remote terminal.
- When using a car audio unit without a remote output on the amplifier, connect the remote input terminal (REMOTE) to the accessory power supply.
- Use the power supply wire with a fuse attached (80 A).
- Place the fuse in the power supply wire as close as possible to the car battery.
- Make sure that the wires to be connected to the +12 V and GND terminals of this unit are at least 4-Gauge (AWG-4) or have a sectional area of more than 22.0 mm².

Remarques sur l'alimentation électrique

- Raccordez le câble d'alimentation +12 V uniquement après avoir réalisées toutes les autres connexions.
- Raccordez correctement le câble de masse à une partie métallique de la voiture. Une connexion lâche peut provoquer un dysfonctionnement de l'amplificateur.**
- Veillez à raccorder le fil de télécommande de l'autoradio à la borne de télécommande.
- Si vous utilisez un autoradio dont l'amplificateur ne comporte pas de sortie de télécommande, raccordez la borne d'entrée de la télécommande (REMOTE) à la prise d'alimentation accessoires.
- Utilisez un câble d'alimentation muni d'un fusible (80 A).
- Fixez le câble d'alimentation le plus près possible de la batterie de voiture.
- Assurez-vous que les câbles à raccorder aux bornes +12V et GND de cet appareil sont d'un calibre d'au moins 4 (AWG-4) ou d'une section supérieure à 22,0 mm².

Precautions

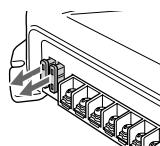

- This unit is designed for negative ground 12 V DC operation only.
- Use speakers with suitable impedance.
- 2 to 8 Ω .
- Do not connect any active speakers (with built-in amplifiers) to the speaker terminals of the unit. Doing so may damage the active speakers.
- Avoid installing the unit in areas subject to:
 - high temperatures such as from direct sunlight or hot air from the heater
 - rain or moisture
 - dust or dirt
- If your car is parked in direct sunlight and there is a considerable rise in temperature inside the car, allow the unit to cool down before use.
- When installing the unit horizontally, be sure not to cover the fins with the floor carpet etc.
- If this unit is placed too close to the car audio unit or antenna, interference may occur. In this case, relocate the amplifier away from the car audio unit or antenna.
- If no power is being supplied to the car audio unit, check the connections.
- This power amplifier employs a protection circuit to protect the transistors and speakers if the amplifier malfunctions. Do not attempt to test the protection circuits by covering the heat sink or connecting improper loads.
- Do not use the unit on a weak battery as its optimum performance depends on a good power supply.
- For safety reasons, keep your car audio volume moderate so that you can still hear sounds outside your car.

Fuse Replacement

If the fuse blows, check the power connection and replace all fuses. If the fuse blows again after replacement, there may be an internal malfunction. In such a case, consult your nearest Sony dealer.

Warning

When replacing the fuse, be sure to use one matching the amperage stated above the fuse holder. Never use a fuse with an amperage rating exceeding the one supplied with the unit as this could damage the unit.

Protection circuit

This amplifier is provided with a protection circuit that operates in the following cases:

- when the unit is overheated
- when a DC current is generated
- when the speaker terminals are short circuited.

The POWER/PROTECTOR indicator lights up in red and the unit will shut down.

If this happens, turn off the connected equipment, take out the cassette tape or disc, and determine the cause of the malfunction. If the amplifier has overheated, wait until the unit cools down before use.

If you have any questions or problems concerning your unit that are not covered in this manual, please consult your nearest Sony dealer.

Précautions

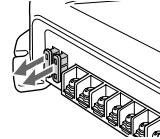

- Cet appareil est conçu pour fonctionner sur du courant continu 12 V à masse négative.
- Utilisez des haut-parleurs d'une impédance appropriée.
- 2 à 8 Ω .
- Ne raccordez pas de haut-parleurs actifs (avec amplificateurs intégrés) aux bornes de haut-parleurs de cet appareil. Cette opération pourrait endommager les haut-parleurs actifs.
- N'installez pas l'appareil à un endroit exposé à :
 - de hautes températures comme sous le rayonnement direct du soleil ou près d'un conduit de chauffage
 - la pluie ou à l'humidité
 - de la poussière ou à des saletés
- Si votre voiture est garée en plein soleil et que la température à l'intérieur de l'habitacle a considérablement augmenté, laissez refroidir l'appareil avant de l'utiliser.
- Lorsque vous installez l'appareil à l'horizontale, veillez à ne pas recouvrir la grille d'aération avec le tapis, etc.
- Si cet appareil est placé trop près de l'autoradio ou de l'antenne, il se peut que des interférences se produisent. Dans ce cas, éloignez l'amplificateur de l'autoradio ou de l'antenne.
- Si l'autoradio n'est pas alimenté, vérifiez les branchements.
- Cet amplificateur de puissance utilise un circuit de protection * visant à protéger les transistors et les haut-parleurs en cas de dysfonctionnement de l'amplificateur. Ne tentez pas de tester les circuits de protection en courrant l'accumulateur de chaleur ou en branchant des charges inadéquates.
- N'utilisez pas cet appareil avec une batterie faible car les performances optimales de l'appareil dépendent d'une bonne alimentation électrique.
- Pour des raisons de sécurité, gardez le volume de votre installation audio de voiture à un niveau permettant encore la perception des bruits extérieurs.

Remplacement du fusible

Si le fusible fond, vérifiez le branchement de l'alimentation et remplacez tous les fusibles. Si le fusible grille encore après ce remplacement, il est possible qu'il y ait un dysfonctionnement interne. Dans ce cas, adressez-vous à votre distributeur Sony le plus proche.

Avertissement

Lors du remplacement du fusible, veillez à respecter l'amperage indiqué au-dessus du logement du fusible. N'utilisez jamais un fusible d'amperage supérieur à celui fourni avec l'appareil, car cela pourrait endommager l'appareil.

Circuit de protection

Cet amplificateur est équipé d'un circuit de protection qui s'active dans les cas suivants :

- en cas de surchauffe de l'appareil
- en cas de génération d'un courant continu
- lorsque les bornes de haut-parleurs sont court-circuittées.

L'indicateur POWER/PROTECTOR s'allume en rouge et l'appareil s'arrête.

Dans ce cas, éteignez tout équipement raccordé, retirez la cassette ou le disque et déterminez la cause du dysfonctionnement. Si l'amplificateur a surchauffé, attendez que l'appareil refroidisse avant de le réutiliser.

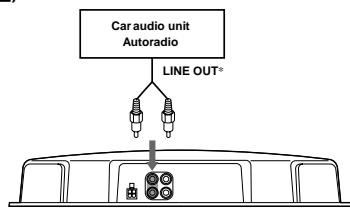

Si vous avez des questions ou des problèmes concernant votre appareil qui ne sont pas abordés dans ce mode d'emploi, adressez-vous à votre distributeur Sony le plus proche.

Input Connections

For details on the settings of switches and controls, refer to "Location and Function of Controls."

Line Input Connection (with Speaker Connection 1 or 2)

Connexion d'entrée de ligne (avec connexion de haut-parleur 1 ou 2)

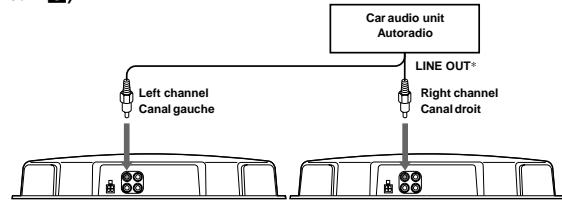

- * You can connect either output terminal.
- * The minimum resistance must be 2 Ω in total.

- * Peu importe la borne de sortie que vous raccordez.
- * La résistance minimale doit être égale à 2 Ω au total.

A

Line Input Connection (with Speaker Connection 3)

Connexion d'entrée de ligne (avec connexion de haut-parleur 3)

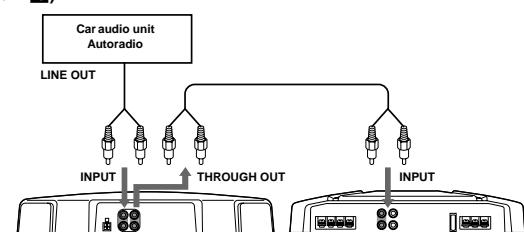

- * You can connect either output terminal.
- * The minimum resistance must be 2 Ω in total.

- * Peu importe la borne de sortie que vous raccordez.
- * La résistance minimale doit être égale à 2 Ω au total.

B

Line Input Connection (with Speaker Connection 4)

Connexion d'entrée de ligne (avec connexion de haut-parleur 4)

When you connect amplifiers using with the THROUGH OUT pin jacks, it allows you to connect up to a maximum of three. Otherwise the necessary output levels can not be obtained, and your car audio may be damaged.

Use the THROUGHOUT terminal when you install more amplifiers. The signals are output as they were input. (LOW BOOST does not work.)

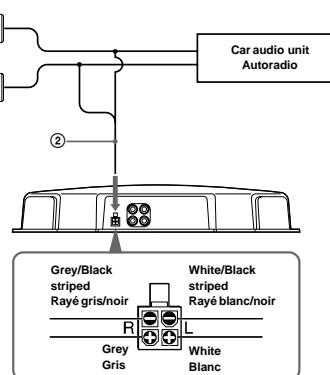

Lorsque vous raccordez des amplificateurs à l'aide des prises à broches THROUGH OUT, vous pouvez raccorder jusqu'à 3 amplificateurs au maximum. Sinon les niveaux de sortie requis ne peuvent pas être obtenus et votre autoradio risque d'être endommagé.

Utilisez la borne THROUGHOUT lorsque vous installez plusieurs amplificateurs. Les signaux sont sortis comme ils sont entrés. (LOW BOOST ne fonctionne pas.)

C

High Level Input Connection (with Speaker Connection 1)

SECTION 3 DIAGRAMS

THIS NOTE IS COMMON FOR PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS.
(In addition to this, the necessary note is printed in each block.)

for schematic diagram:

Note:

- All capacitors are in μF unless otherwise noted. pF : $\mu\mu\text{F}$ 50 WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in Ω and $1/4\text{W}$ or less unless otherwise specified.
- % : indicates tolerance.
-  : nonflammable resistor.

Note:
The components identified by mark \triangle or dotted line with mark \triangle are critical for safety.
Replace only with part number specified.

Note:
Les composants identifiés par une marque \triangle sont critiques pour la sécurité.
Ne les remplacer que par une pièce portant le numéro spécifié.

-  : B+ Line.
-  : B- Line.
- Total current is measured with no-signal condition.
- Power voltage is dc 14.4V and fed with regulated dc power supply from +12V and REM terminals.
- Voltage is dc with respect to ground under no-signal condition.
- Voltages are taken with a VOM (Input impedance $10\text{ M}\Omega$). Voltage variations may be noted due to normal production tolerances.
- Waveforms are taken with a oscilloscope.
Voltage variations may be noted due to normal production tolerances.
- Circle numbers refer to waveforms.
- Signal path.
-  : AUDIO

for printed wiring boards:

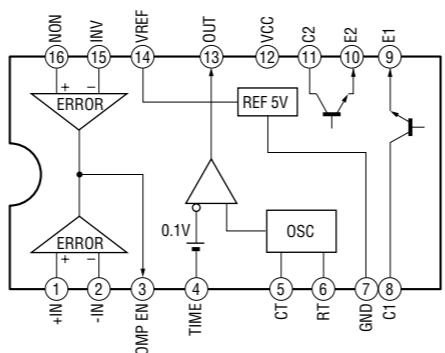

Note:

-  : parts extracted from the component side.
-  : Pattern from the side which enables seeing.
(The other layer's patterns are not indicated.)

Caution:
Pattern face side: Parts on the pattern face side seen from the (Side B) pattern face are indicated.
Parts face side: Parts on the parts face side seen from the (Side A) parts face are indicated.

The components identified by mark \triangle or dotted line with mark \triangle are critical for safety.
Replace only with part number specified.

Les composants identifiés par une marque \triangle sont critiques pour la sécurité.
Ne les remplacer que par une pièce portant le numéro spécifié.
