

Tang Band Quarter Wave Update

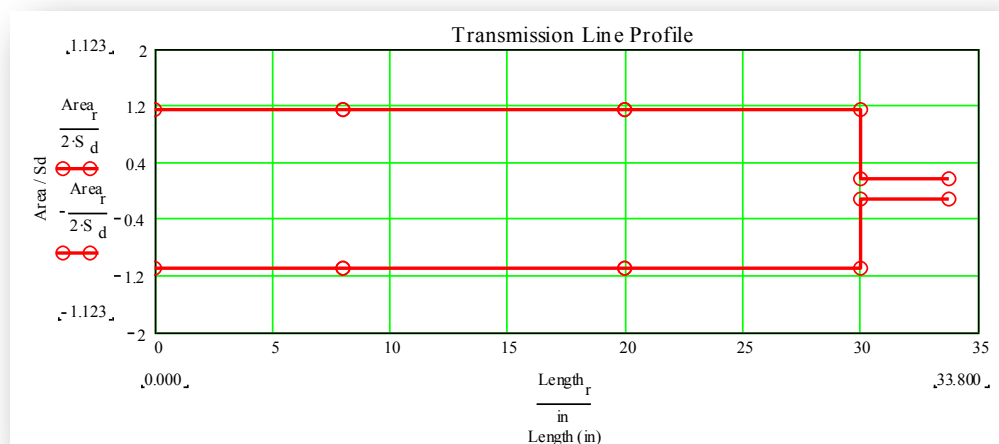

For drivers with Fs 100 Hz or higher the port should be adjusted, as the original build of TABAQ moves the tuning lower a few Hz. (I made a shortcut back then). This works well for 4 inch driver, but for 3 inch drivers the updated port should be used. If you use a 4" driver with Qts 0.4 or lower: Change stuffing to 63 gram.

TABAQ Geometry

Driver – Closed end 8"	20,3 cm	128 cm ²
Driver – Aperture 22"	55,9 cm	128 cm ²
Aperture – 3.8 "	9,7 cm	16 cm ²
Stuffing upper 2/3	0.227 lb	103 gram

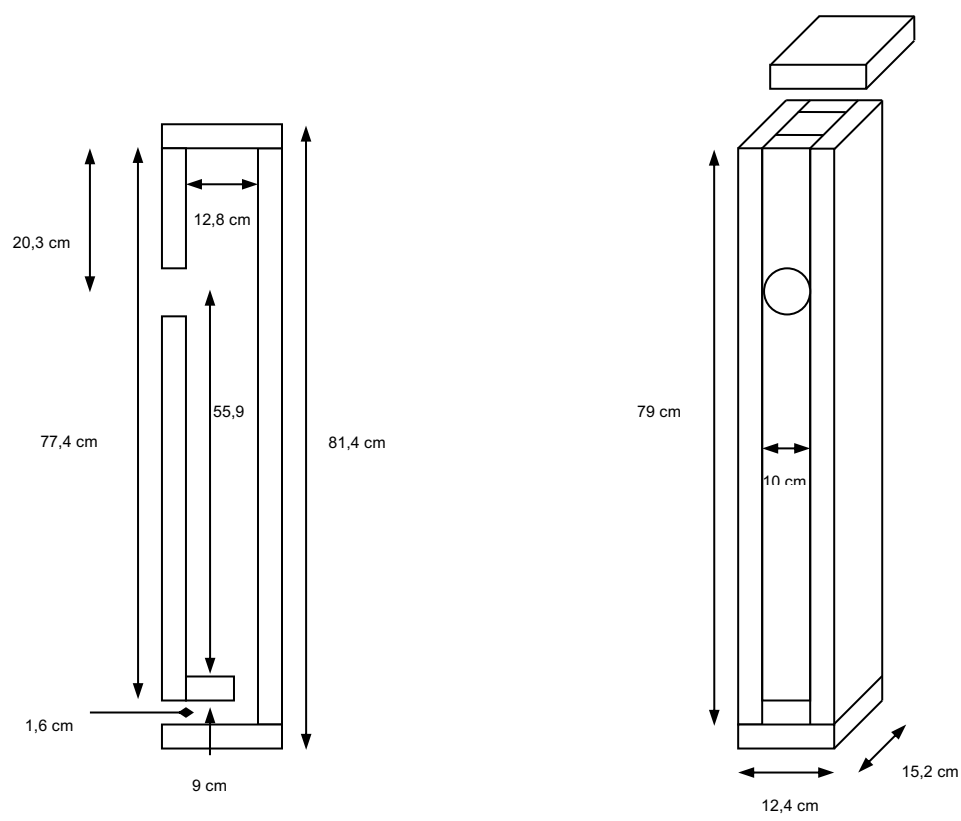

Profile MJK model:

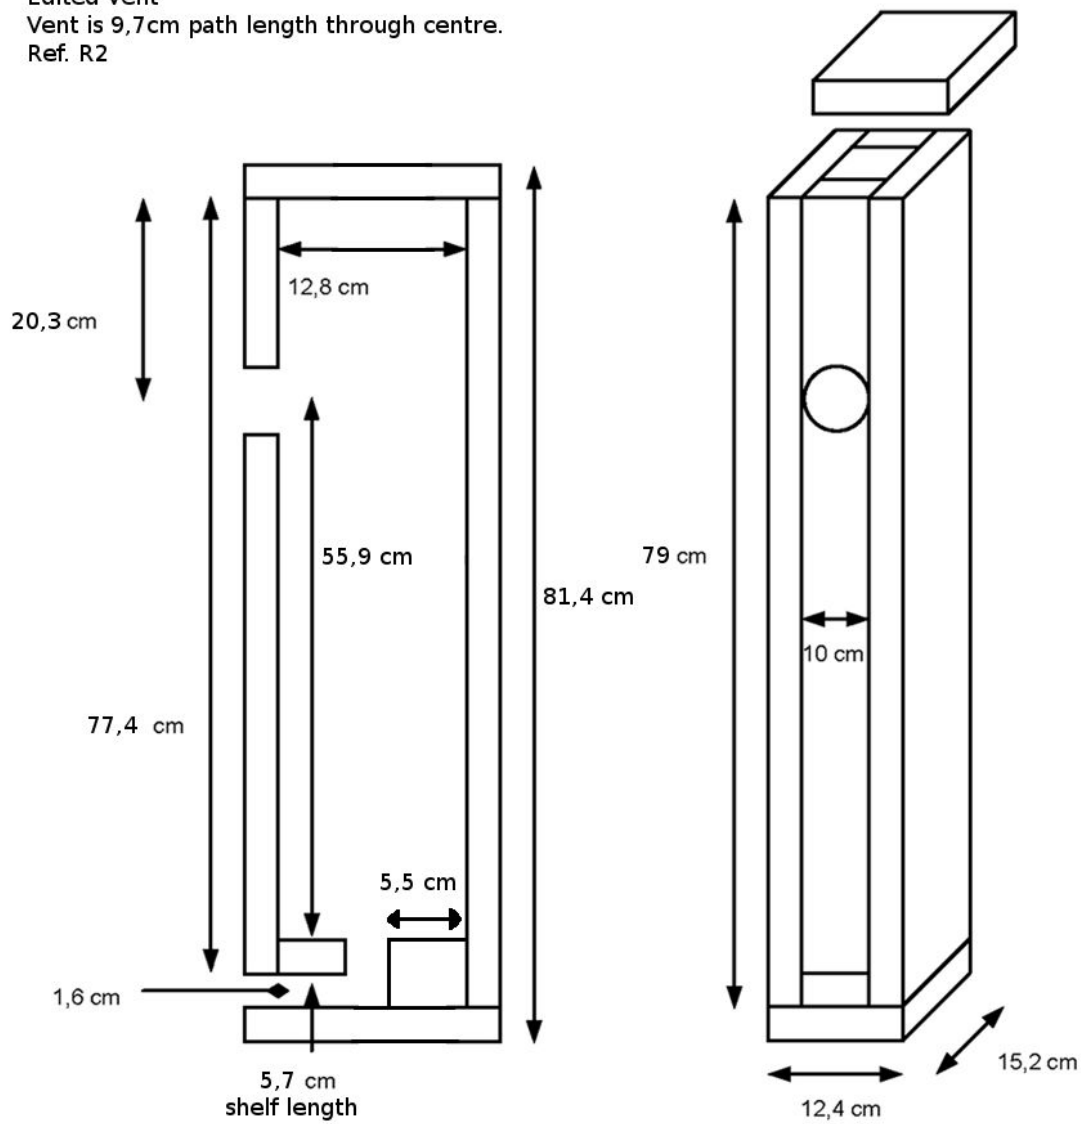

TABAQ – The original

12 mm MDF

TABAQ – Port correct version for 3” drivers

Edited Vent
Vent is 9,7cm path length through centre.
