

Kinda late to the party here but there is less difference between the TG9 and TC9 than the datasheets make out. They perform pretty much identical except in the top octave. The TG9 is the better driver with better high frequency extension and less cone breakup, though the TC9 is not bad by any means. The TC9 is 1-2dB more sensitive also.

Frequency Response 2.83Vrms/30cm - Vifa TG9FD10-08

Frequency Response 2.83Vrms/30cm - Vifa TC9FD18-08
