

Logic power board:

- Do check that D1 to D4 references are fully compatible with your power rails values or better leave unpopulated in case of doubt.

Tie together GND+R with GND-R and GND+L with GND-L.
Could be done on the logic pwr board (as shown) or on the main power V2 board

Remark: The power supply input to the Salas boards could also come directly from the main power board.

Preamp boards:
- Check for ferrite beads locations
- bypass R33+D3 and R34+D4
