

In order to select attenuator type, pay attention to jumpers positions

R2R | Shunt    R2R (on)    Shunt (off)

Jp1    Jp2 & Jp3

and resistors values!

R2R [Shunt]

Use components shown in yellow or green (rectangle) area for LED or LCD display mode

Connections are made with connectors or by soldering wire directly on the board

Also J14 can be use to combine two relays boards for balanced output mode
