cartridge and leads only
for use with Weathers
tone arm only

*"Weathers Technical
Magic Is Sound"*

WEATHERS PROFESSIONAL STEREO PICKUP SYSTEM

with the revolutionary "Amplified Bridge Circuit"

It took five years of painstaking research and uncompromising design to develop what is undoubtedly the world's finest pickup system. To accomplish this amazing engineering feat, Weathers created a unique "Amplified Bridge Circuit". This is at the heart of the pickup... with it you achieve a freshness and fidelity of sound that defies duplication by any other pickup system! Weathers professional pickup reaches down into your record grooves where they've never been touched before... makes old records sound new... it's like hearing all your records for the first time as they were meant to be heard. Sturdy, light-in-weight tone arm floats gently down on your discs, tracking with a force of less than 1 gram... protecting your valuable records from damage and wear for a lifetime! And, this pickup is so carefree and durable, a child can't hurt it! Even if pressure is exerted on the arm, the stylus will retract into the cartridge!

WEATHERS INDUSTRIES 66 E. GLOUCESTER PIKE, BARRINGTON, N. J.
