Dear Ray,  
thank you for sending of this addresses.

I have order information by skytronic and I have receive their catalogue yesterday. Here I have see not the brand name bumper, but I discover the speaker brand name "Zeuz". On your website [www.zeuzspeakers.com](http://www.zeuzspeakers.com) I discover, that zeuz speaker corp. has identical address as bumperspeakers, only other telefon and fax number.

The speakermodel DC18-1250C from Zeuz has identical Data compare to the DC18120C from Bumper.  
Is it in real the same speaker (OEM-version from Bumper)?

In this case I will be order the zeuz-version from Skytronic in Nijverdal/Dutch.

Please confirm me this. In the catalouge from Skytronic I also read, that the US-audio magazines the DC18-1250 have testet with exceptionally performance. Can I find this test on the web? Please send me the webaddress respective the name of the magazine (perhaps voice-coil?) and the month of release.

At last please send me the spread range of the thiele small parameters and the value of the mechanical quality factor (Qms), because I find only the the value from total quality factor (Qts) of the DC 18-1250 respective DC18120C.

Best thanks for your efforts in advance.

Best regards  
A.Kirschner
